More Efficient Than Other Options!

One major advantage of the Dark Age Defense infinity coil system is that it is significantly more efficient at producing electricity than conventional options like solar panels and gas generators.

The proprietary coil technology converts 95% of captured electromagnetic energy into usable electrical current.

This is compared to around 15-20% efficiency achieved by solar collection systems.

By tapping into the unlimited electromagnetic fields surrounding us, Dark Age Defense provides virtually

limitless clean energy with minimal waste.

Reasons the infinity coil is more efficient:

Converts 95% of ambient EM energy harvested

Does not rely on inconsistent solar irradiance

Works 24/7 unlike limited sun hour generation

Coil acts as self-sustaining positive feedback system

No mechanical motion like generators = less loss

Output electricity is high-quality sine wave

Dark Age Defense also requires much lower maintenance over time relative to other power systems.

By leveraging Tesla's innovations in capturing natural EM energy, the Dark Age Defense system provides revolutionary efficiency for off-grid, renewable power generation.

Say goodbye to reliance on inefficient solar panels or backup generators and gain true energy independence.
