

Engineerio's COBie BIM Services Provides Superior Construction Data and Enhanced Facility Management

Engineerio's COBie BIM Services

Edison, New Jersey Aug 5, 2023 ([Issuewire.com](https://www.issuewire.com)) - Engineerio, a prominent provider of [Building Information Modeling](#) (BIM) services, is proud to present its newest offering – COBie (Construction Operations Building Information Exchange) services, specially designed for AEC professionals. This Building Data enrichment is all set to revolutionize building information management and streamline construction projects like never before.

A data exchange standard, COBie, facilitates the efficient exchange of building information between different stakeholders and ensures hassle-free construction and superior facility management. With absolute information about lists of equipment, their make and model, warranties, maintenance schedules, and other relevant data, COBie provides accurate information about the building's components and systems. With all the information captured in digital format, it eliminates data silos and enhances collaboration and decision-making throughout the project lifecycle.

Speaking about this new service addition, Aishwarya R., Director at Enginerio said, “Enginerio's commitment to innovation and excellence has positioned it as a trusted partner for a wide range of international AEC projects. And the introduction of COBie services is yet another milestone in the company's mission to drive digital transformation and elevate the industry's standards. Our COBie services are designed to address the industry's growing need for streamlined data exchange, ultimately leading to smoother project delivery and improved asset management.”

Some of the key benefits of Enginerio's COBie Services include:

- **Streamlined Data Management and Exchange:** It enables smooth data handover between stakeholders and eliminates the need for manual data entry and costly errors.
- **Revit experts:** We have the necessary [Revit BIM](#) capabilities to input the data accurately across Building elements in their respective Revit models.
- **Enhanced Collaboration:** With standardized data formats, all project team members can access and utilize the information effectively. This promotes seamless collaboration and uninterrupted communication between stakeholders throughout the lifecycle of the building.
- **Improved Decision-Making:** COBie BIM services provide valuable insights and critical information about building assets, thus empowering project teams to make informed decisions throughout the project lifecycle.
- **Efficient Asset Management:** The digital records hold comprehensive and accurate information about building assets, simplifying facility management and building maintenance tasks.

For more information about Enginerio's COBie services and how they can enhance your building information management, visit their website at www.enginerio.com.

About Enginerio:

Enginerio is a leading provider of Building Information Modeling (BIM) services, serving clients across North America, Europe, Australia, GCC countries, and Singapore. With a dedicated team of highly skilled professionals, we are committed to driving technological advancements in the AEC industry. Our goal is to empower clients with innovative BIM solutions that optimize efficiency, collaboration, and sustainability in their projects.
