

ExhibitDay Launches Events API and Integrates with Zapier

ExhibitDay is excited to announce the release of its highly anticipated API, empowering automation between ExhibitDay and other third-party software.

ExhibitDay API

Bethesda, Maryland Aug 7, 2023 ([Issuewire.com](https://www.issuewire.com)) - [ExhibitDay](https://www.exhibitday.com) Inc., a leading provider of trade show planning and event project management solutions, is excited to announce the release of its highly anticipated REST API, empowering automation between ExhibitDay and other third-party software. The ExhibitDay API allows users to integrate event data with other applications and streamline the event planning process across various software platforms.

The API serves as a powerful tool that extends the functionality of ExhibitDay's comprehensive trade show planning platform. Users gain access to a range of capabilities, including the ability to create, update, and manage events and tasks directly from their own applications or other third-party software.

Key Features and Benefits of the ExhibitDay API:

Seamless Integration:

The API seamlessly connects with other systems, allowing event professionals to integrate their event data with CRM solutions, marketing automation software, customer support tools, and more. This integration streamlines workflows, improves efficiency, and ensures data consistency across platforms.

Real-Time Data Sync:

With the API, event data can be synchronized in real-time, enabling instant updates across multiple platforms and eliminating the need for manual data entry.

Enhanced Collaboration:

Event organizers can leverage the ExhibitDay API to facilitate collaboration by integrating events and tasks with project management tools, communication platforms, and team collaboration software, ensuring everyone involved has access to the most up-to-date information.

Advanced Trace Show Analytics:

By integrating ExhibitDay with analytics tools, event professionals can unlock valuable insights into event ROI, engagement, and performance, enabling data-driven decision-making and optimization. This data-driven approach empowers trade show teams to optimize their strategies, identify areas for improvement, and make informed decisions to enhance the overall event experience.
