

FindGuide has launched an app for tour guides on the App Store and Google Play

The FindGuide:

Tourist Guide app
is now available!

Dubai, United Arab Emirates Sep 4, 2023 ([Issuewire.com](https://www.issuewire.com)) - The international platform FindGuide, which helps guides and travelers easily find each other, has announced a new mobile app for tour guides.

[Find Guide: Tourist guide app](#) allows guides from different countries to offer their services to international travelers.

To use the application, guides have to create a profile and pass verification. In the profile, they can provide information about their education and professional experience, upload pictures from previous tours, and get help from the support center.

After verification, guides can receive tourist requests, respond to orders that were created earlier, and chat with potential clients. With the Find Guide app, offering private tours and exclusive travel has become easier than ever.

[FindGuide](#) is a platform that helps tourists and guides find each other quickly. The service was introduced in 2022 and has been constantly developing since then. The platform features more than 500 professional local guides living in major tourist cities (e.g. Cairo, Istanbul, Dubai, etc.).

FindGuide also has an application for tourists where they can create requests for trips in the countries they are going to. Both applications are user-friendly and have interfaces in different languages (English,

Spanish, German, French, Italian, Turkish, and Arabic).
