

Leawo Reveals Back to School Promo to Offer 50% Off AI-powered PhotoIns for Editing Photos Perfectly

Leawo has kicked off 2023 back-to-school campaign offering products with 50% off PhotoIns and 30% sitewide coupons for all purchases on Leawo.org.

Shenzhen, Guangdong Aug 29, 2023 ([IssueWire.com](https://www.issuewire.com)) - Just in time for back-to-school preparation day, many activities have been rolled out to provide different products with favorable prices. Leawo, a multimedia software company that devotes the best service to every user, also has attended this promo campaign with the [2023 Back to School Sales](#) until September 15, 2023. For people who have blurry and low-resolution images, one of the best solutions is [PhotoIns](#), which is available with a 50% discount, and half the cost can be saved for the lifetime plan, pricing at \$54.97 now instead of the original \$109.95. It is a 3-in-1 photo solution package, including AI Photo Enhancer, Photo BG Remover, and Photo Enlarger. Each of them will be introduced below:

[Photo Enhancer](#) is a powerful AI portrait enhancer that automatically improves quality of a batch of photos in 1-click. It can fix exposure issues, create a beautiful sky, remove haziness, beautify portrait photos, and improve photos with vivid colors. Meanwhile, it allows users to process RAW files with an auto lens correction feature, fixing issues like distortion, chromatic aberration and vignetting on images. Moreover, this advanced Photo Enhancer is able to fix JPG image issues caused by compression and produce JPG images with much better quality.

[Photo BG Remover](#) can remove photo background automatically in batch and change the background in clicks, with no limit on quantity and size. It not only supports manual adjustment for precise background removal and editing under various effects but also extracts transparent objects from photos and cuts out intractable objects like hair or fur. Meanwhile, customizing photo background by changing it to a solid color or any photo is supported.

[Photo Enlarger](#), as an AI-powered image upscaler, can upscale/downscale image resolution in batch with 5x hardware acceleration and maintain clarity and sharpness or provide better quality. It allows

users to remove noise and mist automatically or manually, and enhance image quality through contrast and brightness.

No matter fixing several issues existing in photos, or perfecting portraits in various aspects, this AI-powered toolkit makes it easy to do these in clicks with lossless quality. It provides three versions for choice: free trial, registered version, and expired version. The expired version is the same as free trial version. More details are provided on Leawo's official site. Besides, 30% sitewide coupons for all purchases on Leawo.org are offered at the bottom of the activity page and other products are available with up to 91% discounts.
