

Mildstyles Cycling Animal Motifs into Trendiness with 2023 Collection of Men's Animal Print T-Shirts

The online retail store is bringing back the lost glory of animal printed outdoor clothing for men.

Guangzhou, Guangdong Aug 10, 2023 ([IssueWire.com](https://www.issuewire.com)) - From the most environmentally-conscious to the most adventurous, men who love outdoor activities are reclaiming the fashion trends of yesteryears like never before. In keeping with the trends, online retail store Mildstyles recently attempted to re-chic the old and classic animal-inspired prints with their latest collection of men's outdoor t-shirts.

The men's [animal print t-shirts](#) that the company rolled out recently come with forest animal illustrations only. The owners stated that most of their customers are outdoor activity enthusiasts, hence they decided not to incorporate domestic animals into their designs.

"Forest animals are never out of style, which is why top designers like Roberto Cavalli opted for desert sand snake prints on their upmarket clothing line. We, on the other hand, wanted to capture the universal appeal of forest animals, like bears, leopards, and racoons to impress our customers, who are adventurous, animal-loving, whimsical and humorous. Our designers wanted to merge the "geek" appeal of the different spirit animals with the color palette and they did a lot of experiments. We think the end results are not just visually stunning, but are also good for people who are environmentally-conscious", a top sales executive of the company said.

"When someone wears an animal-printed t-shirt during hiking or cycling out in the woods, it should make them happy as they can literally wear their favorite forest animals without killing or hurting them. So, if anybody wants to gravitate towards the animal-printed outdoor fashion for men not just for the visual appeal, but for the eco-friendly appeal, they should check out our animal-inspired [men's t-shirts](#) once", he added.

Mildstyles has been at the forefront of men's outdoor fashion since its formative years. The company, which was born in the middle of 2021, amidst a global crisis, has been prioritizing simplicity and quality since the beginning. The outdoor deep forest style has dominated most of their collections till now.

Speaking on this, the CEO and managing director of the e-store said, "We are here to serve people who love getting closer to the nature, caring for the environment, and protecting animals. Our animal-printed t-shirts will give a strong message of protecting endangered animals and making this planet a more beautiful place."

About the Company
