

TotalWebTool Expands Website Analysis with New Cutting-Edge Features

At TotalWebTool, innovation never stops. The latest roll-out is packed with features designed to supercharge websites' user experience. From a game-changing WordPress plugin to spell checking, there are now more diagnostic checks available.

TOTALWEBTOOL

Chicago, Illinois Aug 24, 2023 ([Issuewire.com](https://www.issuewire.com)) - TotalWebTool, the leading website analysis solution, is thrilled to announce a series of powerful new features that further establish its dominance in the domain of website diagnostics. The recent advancements underscore the tool's commitment to providing users with the most [comprehensive and user-friendly website assessment solution](#) available.

Among the recently launched features are:

- **Advanced Spell Checking:** Elevate the professionalism of website content by catching and correcting typos across multiple languages.
- **SafeBrowsing Checks:** In an era where digital security is paramount, TotalWebTool ensures websites aren't flagged by Google for potential threats like phishing, malware, and spoofing.
- **Efficient Broken Links Detection:** Enhance user experience and facilitate smoother search engine indexing by identifying and rectifying broken links.
- **WordPress Plugin:** WordPress users can now directly harness the power of TotalWebTool within their dashboard, making website optimization more seamless than ever.

With over 150 diagnostic checks, these new additions further solidify TotalWebTool's position at the forefront of website analysis. "Our mission has always been to provide the most detailed, actionable insights for website owners, and these new features represent a significant leap towards that goal," said Todd Alexander, product lead for TotalWebTool.
