

US Army Reserves Major, Deveney Shea, Secures Title of Ms. Earth Air at the International pageant held in Philippines

Deveney Shea Wins Coveted Ms. Earth Air Title in Manila, Philippines, Brings Environmental Advocacy Crown Back to the USA

Kansas City, Kansas Sep 4, 2023 ([IssueWire.com](https://www.issuewire.com)) - Deveney Shea, an inspiring beacon of change, has proudly secured the title of Ms. Earth Air at the international pageant held in Manila, Philippines. This remarkable achievement has not only marked a wonderful victory for the USA but also reignited the passionate call for environmental preservation on a global stage.

Deveney Shea, a dedicated Major in the US Army Reserves, is currently serving with a Civil Affairs Unit in Chicago, IL. Not only is she a defender for our Nation, she is a defender for the Earth. Her remarkable victory at the Ms. Earth competition underscores her unwavering commitment to a cause that transcends borders and speaks to the heart of a greener, kinder Earth for animals and all Earth inhabitants. Her platform, "Be Kind to Every Kind," resonates with her core belief that the planet we share is intricately connected to the well-being of all its inhabitants, particularly the voiceless creatures who share our home.

Globally, animals face alarming levels of abuse and exploitation. From elephants being overburdened in the tourism industry to the cruel confinement of poultry in the food sector, and the testing of cosmetics on innocent animals, their plights are many and varied. Such instances are not isolated; they paint a broader picture of systematic neglect and cruelty. But hope is on the horizon. Deveney's campaign strives to not only raise awareness of these issues but to also educate the masses on humane alternatives. Whether it's adopting a plant-based diet, supporting cruelty-free entertainment, or purchasing ethically-produced cosmetics, every choice can be a step towards compassion.

At the heart of Deveney's platform is a profound understanding of the deep-rooted misconceptions associated with animal agriculture. Beyond the obvious ethical concerns, animal agriculture leaves a devastating environmental footprint. The vast amounts of water used, deforestation, and the production of methane – a greenhouse gas 25 times more potent than CO₂ – are but a few examples of the deleterious impact of this industry on our planet.

Deveney is more than just an advocate; she is a beacon of hope. Her genuine soul and loving spirit resonate in every endeavor, reminding us all of the importance of kindness. "In our shared world," says Deveney, "true progress lies in recognizing the value of every life. Whether it's the animals, the trees, or our fellow humans, every act of kindness ripples outward, creating waves of change." During her reign she will continue educating others and also plans to visit many states advocating and possibly assisting to raise funds for the organizations, rescues, sanctuaries, etc. which are safe havens for animals.

To be kind to every kind is not just an ideal; it's a vision of a world where respect and compassion are the foundations. It means recognizing the interconnectedness of all life and understanding that our choices, big or small, have a profound impact. It's about seeing the soul in every eye, whether human, animal or the whispering trees. Join Deveney in her relentless journey towards a world where kindness is not selective, but all-encompassing. A world where every kind is kind to every kind.

About Deveney Shea: Deveney is a daughter, mother and friend to many who lives in Kansas City and focuses on raising awareness about animal welfare and the broader implications of our choices. Follow Deveney or reach her at <https://www.instagram.com/ms.earth.usa/>
