

Laws.com Legal Network Launches AI Legal Tech to Provide Free Legal Information to Users Worldwide

Boca Raton, Florida Sep 19, 2023 ([Issuewire.com](https://www.issuewire.com)) - [Laws.com](https://www.laws.com), one of the leading online legal information platforms, has announced the launch of its new AI legal tech, which will enable users worldwide to access legal information and attorneys regardless of their economic background. This innovative platform leverages the power of Artificial Intelligence (AI) to provide all users with quality tools to obtain legal information, codes, statutes, cases, resources, and access to attorneys in a simple and easy-to-understand manner.

Laws.com's AI legal tech is being architected and developed by chess [Grandmaster Boris Kreiman](#), his wife, and co-founder, Kseniya Dzigava and their team. Kreiman, also a founder of [GrandmasterChess.org](#) for teaching children the potential of AI through chess, was one of the first researchers to explore the power of Artificial Intelligence, analytics, and processing. He has witnessed the birth of artificial intelligence as we see it today. Boris worked on AI through chess servers in the early 2000s, testing the power of machine vs. human imagination and instinct, and has over 20 years of experience in technologies, developing calculating algorithms and AI analytical processes. The combination of chess genius and expertise in AI with its transformative potential has been instrumental in the development of Laws.com's AI legal tech. Kreiman finds that artificial intelligence can help balance out the scales of justice and change the way legal tech works today.

With the new AI legal technologies and tools, Laws.com is aiming to democratize legal knowledge and make it more accessible to everyone, including legal industry professionals. Through the platform, users can access information on a wide range of [legal forms](#) and issues, including immigration, family law, real estate, and business law, and become beneficiaries of the big data analysis that AI algorithms can offer. The AI-powered tool boasts an intuitive and user-friendly interface, making it easy for anyone to understand complex legal concepts and information that was previously unattainable, bringing light to the mystery of the legal industry.

According to Laws.com COO, Kseniya Dzigava-Kreiman, "Our mission has always been to break down the barriers that prevent people from accessing legal resources. We believe that everyone has the right to access the legal information they need to make informed decisions about their lives. It is common sense, but that's not how it works today. With our new AI legal platform, we are taking a giant step forward in fulfilling this mission."

The development of this AI legal tech is a significant milestone in the legal industry, as it has the potential to revolutionize the way legal data is accessed. By leveraging AI technology, Laws.com is making legal information more accessible than ever before and breaking down the economic barriers that have long prevented marginalized communities from accessing the legal resources they need.

The new AI legal tech from Laws.com is a testament to the power of AI and its potential to transform the legal industry among many others. With its user-friendly interface and accessible format, the platform will undoubtedly help countless individuals around the world access the legal resources they need to navigate complex legal issues.
