

Pediatric Dentist Services Explained

Smiles on Queen Dentistry in Bolton offers much more than general dentistry. One of the most difficult things to do is to find a dentist who can successfully deliver children's dental services and build great rapport with your child.

Bolton, Ontario Sep 27, 2023 ([IssueWire.com](https://www.issuewire.com)) - Our team has the professional experience required to provide the care and attention that your children need. A lifetime of healthy teeth begins with the foundations of hygiene and proper maintenance formed in childhood. However, many children are afraid to go to the dentist or are highly uncooperative when they do go for check-ups and treatments. At Smiles on Queen, we focus our attention on creating encouraging interactions with children through games and fun engagement in order to change their feelings about visiting the dentist from an early age. In this way, we help kids to change their negative feelings about visiting the dentist into positive and healthy feelings.

The pediatric dentistry services we offer are extensive. They include regular check-ups and cleanings, fluoride treatments, cavity fillings, and tooth removal. But children may also require more intensive treatments when accidents leave them with chipped or broken teeth that need to be repaired. Oral trauma treatment and [pulp therapy](#) may also be necessary in some cases. Losing baby teeth too early also leaves spaces that need to be filled with space maintainers to prevent crowding or misalignments of the remaining teeth.

Childhood dental issues like misaligned teeth, over- and underbites, and even grinding teeth while sleeping can lead to a lifetime of issues and discomfort. It's best to solve these problems early through [orthodontics](#) to set your children on a path to great oral health. Our team offers all of these services, with special attention and care for kids.

An ounce of prevention...

A great dentist has to be able to do more than simply solve problems as they arise. They also need to have the ability to teach kids hygiene habits and instill in them the importance of keeping their teeth healthy and clean. We engage children in fun activities to teach them how to maintain good oral health. They learn the when, why, and how of brushing and flossing and the importance of a healthy diet for their teeth. And, of course, we can advise parents on which toothpaste and brushes are best for their kids, how to encourage them to brush, and even methods for helping little ones give up thumb-sucking habits.

Why choose us?

At Smiles on Queen Dentistry in Bolton, we have the pediatric dentistry training and experience to give your children the quality of care they deserve. We're confident that once you bring your children to visit us, they'll change their outlook on going to the dentist and adopt a new perspective on the importance of taking care of their teeth. For children who are very young or require extensive dental work, we also provide safe sleep dentistry.
