

ProxyPics Joins Guidewire's Insurtech Vanguard to Revolutionize the Insurance Landscape

Innovative Data Collection Technology Empowers Insurers with Real-time Visual Insights, Redefining the Future of Property and Casualty Insurance

Chicago, Illinois Sep 22, 2023 ([Issuewire.com](https://www.issuewire.com)) - ProxyPics, a patented data collection technology platform, announced that the company has joined Guidewire's Insurtech Vanguard program, an initiative led by property and casualty (P&C) cloud platform provider, Guidewire (NYSE: GWRE), to help insurers learn about the newest insurtechs and how to best leverage them.

"ProxyPics is excited to join the Guidewire Insurtech Vanguard Program to help insurers learn how they can significantly improve operational efficiency, reduce costs, and minimize risks, in efforts to modernize their processes and stay competitive in the market, said Luke Tomaszewski, CEO and Founder, ProxyPics. "Our technology platform can expedite the claims assessment process by providing insurers with the ability to obtain real-time images of damages by the policyholder or our nationwide network of data collectors who can provide a wealth of property insights sourced from our intuitive mobile app."

This capability expedites claims assessment, leaving no room for unnecessary delays in settling policies. The insurance landscape is shifting, and ProxyPics is driving the charge toward a future where technology and imagination intertwine, carving a path to unparalleled success.

Insurtech Vanguard is a community of select startups and technology providers that are bringing novel solutions to the P&C industry. As part of the program, Guidewire provides strategic guidance to and

advocates for the participating insurtechs, while connecting them with Guidewire's P&C customers.

"We are thrilled to welcome ProxyPics into our Insurtech Vanguard program and help introduce their game-changing technology to the industry," said Laura Drabik, Chief Evangelist, Guidewire. "ProxyPics is helping to revolutionize the way we gather property visual data in real-time, saving time, money, and resources."

In addition to its swift claims assessment capabilities, ProxyPics offers advanced artificial intelligence algorithms that can analyze images for further insights, such as property condition assessments, and asset valuation, and even detect potential risks that may have gone unnoticed otherwise. This cutting-edge technology brings an extra layer of value to insurers, elevating their decision-making processes and expanding their understanding of policyholders' assets.
