

Shoviv Software Launches Cloud Dive Migrator to Make Cloud Migration Easy and Fast

London, United Kingdom Sep 5, 2023 ([IssueWire.com](https://www.issuewire.com)) - We have some great news for Microsoft 365 and Google Workspace users: Shoviv Software has just released the most awaited software of the year 2023. Shoviv [Cloud Drive Migrator](#) makes it easier for users to quickly and smoothly migrate from One Drive to Google Drive, Local Drive and vice versa. We aim to bring standalone software that meets the needs of both One Drive and Google Drive users. Also, the user interface of this tool is amazing and flawless, which makes performing the drive migration easier.

Some of its remarkable features to which we would like you to draw attention: Migrate OneDrive to Google Drive: Users can now migrate the data stored in OneDrive into Google Drive without making any limitation on the size of files/data.

Migration Job Scheduling Facility: This option makes it easier for the users to automate the migration job. This tool gives various migration options, including daily, weekly, and monthly.

Selective Data Migration: Using the software data filter option in which users will get multiple data filter criteria can selectively migrates data. Applying such filters will make sure to greatly impact the target drive.

Runs Several Migration Job Simultaneously: It is capable of managing multiple drive migration, like Google Drive to One Drive, OneDrive to Google Drive, etc., at the same time period.

Copy/Paste Functionality: The software offers a way for users to migrate any of the selected data by using the copy function. The paste option enables migrating the selected item to the desired target. In simpler terms, users can create the new migration via copy/paste.

Default Incremental Export: This migration utility also has got some of the most required features in the migration. Due to this, the software will only take the remaining data when users resume the migration process.

Better UI: It comes with a best-in-class user interface that makes it easier for all the users to handle the drive migration without needing assistance from others.
