ALAN J. BENESI

Tampa, Florida Oct 12, 2023 (Issuewire.com) - Esteemed author, Alan J. Benesi is set to participate in the prestigious 2023 AASL National Conference, taking place from October 19 - 21, 2023 at the Tampa Convention Center. His groundbreaking book, Theory of Consciousness, will be exhibited under Authors Press, booth 414, and will be available for purchase.

Theory of Consciousness is a revolutionary exploration of consciousness in scientific terms. Benesi proposes that conscious entities, the instigators of all forces, exist wherever forces exist. These entities exist in the nuclear, atomic-molecular, biological, and astronomical space-time realms. The book suggests that consciousness is ultimately all that exists.

Benesi's work is a thought-provoking journey into the realms of quantum mechanics, relativity, the uncertainty principle, unified field, and evolution. It brings joyous tidings to those who seek a deeper understanding of the universe and our place within it. The paperback edition is priced at \$13.99, while the Kindle edition is available for \$5.99.

Alan J. Benesi, born in San Francisco in 1950, is a distinguished figure in the scientific community. He earned his Ph.D. in biophysics at UC Berkeley and has made significant contributions as a nuclear magnetic resonance (NMR) spectroscopist at major universities. With over 75 peer-reviewed publications in scientific journals and two previous books, Benesi continues to push the boundaries of scientific understanding.

Authors Press, the company exhibiting Benesi's book, is a renowned publishing company dedicated to helping authors bring their work to the world. They provide a platform for authors to share their unique perspectives and contribute to the global conversation.
