

Al Aliyo Hydrofarms Redefines Freshness with Hydroponically Grown Garlic Greens and Spring Onions in the UAE

Dubai, United Arab Emirates Oct 21, 2023 ([IssueWire.com](https://www.issuewire.com)) - **Al Aliyo Hydrofarms** is proud to introduce a new dimension of freshness to the UAE market. Leveraging innovative hydroponic farming techniques, the company has launched its premium range of hydroponically grown Garlic Greens and Spring Onions, delivering unmatched quality and flavor to local consumers.

Setting New Standards for Freshness

Hydroponics, an innovative method of cultivating plants without soil, is at the heart of Al Aliyo's mission. Their state-of-the-art hydroponic facilities provide the ideal environment for nurturing these flavorful greens. Hydroponics allows for precise control of environmental variables such as light, water, and temperature, ensuring optimal growth and the retention of essential nutrients. As a result, consumers can now relish the vibrant flavors and health benefits of these culinary essentials without being subject to seasonal limitations.

Unveiling the Culinary Stars

Garlic Greens - A Nutritional Powerhouse: Al Aliyo's hydroponically grown garlic greens are a nutritional powerhouse. Packed with antioxidants, vitamins, and minerals, especially vitamin C, they contribute to a bolstered immune system. Beyond immune support, these greens promote better digestion, aiding in alleviating issues such as bloating, gas, and indigestion. Furthermore, garlic greens are valued for their potential to support respiratory health, making them beneficial for conditions like asthma, bronchitis, and common colds.

Spring Onions - Flavorful and Versatile: Al Aliyo's hydroponically grown spring onions offer a delightful fusion of culinary appeal and health benefits. Their vibrant green tops and mild oniony kick make them a versatile addition to a variety of dishes, from salads and salsas to stir-fries and grilled entrees. In addition to their culinary charm, they are recognized for their potential to support cardiovascular health by aiding in blood pressure regulation and reducing the risk of heart-related issues.

A Commitment to Sustainability

At Al Aliyo Hydrofarms, sustainability is a core principle. Their hydroponic farming methods are resource-efficient, employing a water-negative process that significantly reduces carbon emissions. This commitment to eco-conscious practices aligns with the UAE's vision for a greener and more sustainable future.

Embracing a Healthier Lifestyle

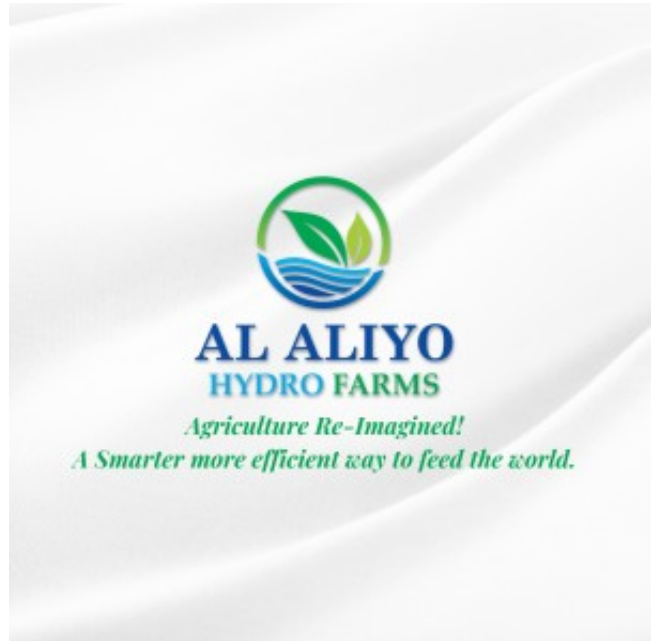

Consumers in the UAE can now access these farm-fresh Garlic Greens and Spring Onions at leading hypermarkets and select HORECA establishments. The introduction of these hydroponically grown delights not only enhances culinary experiences but also encourages a healthier, more vibrant lifestyle.

Al Aliyo Hydrofarms invites the UAE's culinary community to embrace this local, sustainable, and nutritious produce. The future of UAE's agriculture is here, and it's hydroponically grown for a healthier, tastier tomorrow.

About Al Aliyo Hydrofarms:

Al Aliyo Hydrofarms is a leading hydroponic farming industry based in Sharjah, UAE. Their commitment to sustainable agriculture and innovative growing techniques ensures the production of high-quality, fresh, and nutritious produce. By cultivating hydroponically grown garlic greens and spring onions, they are revolutionizing the UAE's culinary landscape and setting new standards for locally sourced, premium vegetables.
