

Daryl Guberman Exposes ANSI- ANAB Wuhan Bio-Level-4,Forensic,& Other Laboratory Certification Scheme

With most Americans eyeing China with much-deserved suspicion, the Quality Certification world finds itself very much in the clutches of Chinese state actors. One name stands tall and commands respect like no other: Daryl Guberman.

New York City, New York Oct 31, 2023 ([Issuewire.com](https://www.issuewire.com)) - Quality Accreditation bodies are operating under head-shaking conditions with shocking ties and associations. ANSI-ANAB is a good example, tied in with a near-unbelievable recent laboratory certification scheme. Industry expert and authority Daryl Guberman is bringing the truth to the public in two new videos. The videos, titled, **“Underwriter For Wuhan Lab ANSI-ANAB Responsible For Failure in Laboratory Processes Protocols** <https://youtu.be/r1iUJzYaAFY> and “ https://youtu.be/8RZCxBT1T_g are packed with information that is next to impossible to deny. Guberman, who is the founder of Guberman-PMC, brings remarkable experience in the area of quality certification concerns to the table that few people share. This article illustrates ANSI-ANAB's failure in Laboratory accreditation **ANAB Suspends DC Crime Lab's Accreditation (Please note that the DFS Crime lab sits on the ANSI board along with the FBI! <https://www.forensicmag.com/574870-Update-ANSI-Suspends-DC-Crime-Lab-s-Accreditation/>**

He is also a committed American patriot who understands the dangers posed by things like Chinese, Iranian, Pakistani, and other hostile national influence (or control) in the quality field and beyond.

“This laboratory certification scheme is really reprehensible in all of the worst ways,” commented the always-driven and passionate Guberman. “ANSI, ANAB, and the rest of these related organizations are a huge danger both to our country and to the companies that they are accrediting poorly. Check out my two latest videos to really see behind the veil.” Guberman went on to say quality certification is about consistency and Ms. Pamela Sales VP of Forensics at ANSI-ANAB under deposition in Austin Texas (2017) stated “there is no commonly agreed-upon set of standards that forensics labs around the country have to follow. Instead, there are informal guidelines that labs can choose to follow or not” See here: <https://www.austinmonitor.com/stories/2017/09/austins-crime-lab-failure-points-national-crisis/>. Basically, saying Laboratories both National and International are in crisis, but they are still issuing certifications. An example of International Failure was in Wuhan China where the head of the IAF (International Accreditation Forum) & also CNAS (China National Accreditation Services Xiao Jianhua Certified the Laboratory (2017) which failed see here: <https://www.news10.com/business/press-release/s/ein-presswire/623363817/in-2018-diplomats-warned-of-risky-coronavirus-experiments-in-wuhan-lab-no-one-listened/>.

Most companies operate under the illusion that the large Quality Certification organizations are American-run and consider things like security and the United States's interest when operating.

Daryl Guberman

Daryl Guberman boasts a wealth of experience spanning four decades in the realm of quality across diverse sectors, including aerospace, medical implants, medical materials, printing, plastic distribution, consulting, NADCAP implementation, and certification services. His expertise transcends industry boundaries, as he has successfully advised companies from various sectors, enabling them to achieve substantial cost savings while instilling confidence in the quality of their products and services.

Daryl Guberman is widely recognized as an authority in specialized areas such as aerospace, medical implants and materials, and printing. He is renowned for his in-depth knowledge and unwavering commitment to quality standards in these fields.

For those seeking his guidance or wishing to discuss potential projects, Daryl Guberman is readily accessible via phone at 203-556-1493 or email at daryltqrs@yahoo.com. You can get in touch with him directly to tap into his wealth of knowledge and experience.
