Services provided by Gateway Little Smiles:

Preventative care: it is the foundation of good oral health. A dental prophylaxis is a cleaning procedure performed to clean the teeth thoroughly.

Fluoride treatment: it helps to prevent cavities by protecting and strengthening mineral compositions of the enamel of your teeth.

Sealants are thin, white plastic coatings placed on the chewing surface of the back of teeth. These teeth have pits and grooves, making them more susceptible to food, trapping plaque, and leading to decay.

Extractions: there are also some situations when a permanent tooth erupts, and the primary tooth is not loosed in the way of a permanent one [children's dentist in Collinsville](#) has to help remove the primary tooth for proper development and alignment.
