

Medical Cosmetic Enhancements Offers CoolSculpting Elite in Washington DC: The Solution for Non-Invasive Body Contouring

Washington, D.C, District of Columbia Oct 18, 2023 ([IssueWire.com](https://www.issuewire.com)) - Washington DC residents seeking an effective, non-invasive solution for body contouring have a reason to celebrate. Medical Cosmetic Enhancements, a renowned leader in the field of aesthetic medicine, is proud to offer the advanced CoolSculpting Elite technology, an upgrade from traditional CoolSculpting, right in the heart of the nation's capital.

CoolSculpting Elite has revolutionized the world of cosmetic enhancements. This FDA- approved technology is an advanced version of traditional CoolSculpting, covering 18% more tissue and capable of treating two body areas simultaneously to reduce treatment time.

*Drew Varano, the owner of Medical Cosmetic Enhancements, is enthusiastic about offering **CoolSculpting Elite in the Washington DC** area. He stated, "We have been offering CoolSculpting for about 13 years, and we are committed to providing our clients with the most advanced and effective cosmetic treatments available. The Elite version is a significant advancement in body contouring, and we are excited to offer this to our patients."*

Dr. Varano, who has over 3000 liposuction procedures under his belt, personally conducts the initial consultations. His extensive experience is invaluable for patients who may be better suited for liposuction rather than CoolSculpting Elite. Dr. Varano provides a professional evaluation, discussing the pros and cons of both treatments to help you reach your aesthetic goals.

CoolSculpting Elite is ideal for targeting 9 troublesome areas where fat tends to accumulate, such as the abdomen, love handles, thighs, bra roll, arms, and under the chin. The treatment involves a specialized applicator that delivers controlled cooling to freeze and destroy fat cells. Over the following weeks, the body naturally eliminates these damaged cells, resulting in a more sculpted appearance.

One of the many advantages of CoolSculpting Elite is its minimal discomfort and downtime. Patients can typically return to their daily activities immediately after treatment, making it a convenient option for those with busy schedules.

Medical Cosmetic Enhancements takes pride in its team of highly trained and experienced professionals who offer personalized consultations and treatment plans tailored to each patient's unique needs and goals. With the addition of CoolSculpting Elite to their range of services, they are well-equipped to address a broader spectrum of cosmetic concerns.

In addition to CoolSculpting Elite, Medical Cosmetic Enhancements offers a comprehensive range of cosmetic treatments, including liposuction, J Plasma, Botox, dermal fillers, laser skin rejuvenation, semaglutide weight loss program and more. Their commitment to using the latest technologies ensures that patients receive the highest quality care and achieve outstanding results.

For those interested in exploring the possibilities of CoolSculpting Elite in Washington DC, Medical Cosmetic Enhancements invites you to schedule a consultation with their expert team. Visit their website <https://www.medicalcosmetic.org/> to learn more or to schedule a consultation.
