

Plugin Support Launches Revolutionary Human + AI Customer Support Platform Just in Time for Holiday Sales

Honolulu, Hawaii Oct 6, 2023 ([IssueWire.com](https://www.issuewire.com)) - Plugin Support Launches Revolutionary Human + AI Customer Support Platform Just in Time for Holiday Sales

In a groundbreaking move set to revolutionize the world of customer support, Plugin Support [www.plugin-support-now.com] announces the launch of its state-of-the-art platform, blending human

expertise with AI precision. Scheduled to go live on October 23, this platform arrives perfectly timed for businesses gearing up for the holiday sales rush.

The innovative Plugin Support system isn't merely about accelerating response times. It's about creating a symbiotic relationship between agents and AI, ensuring that customers experience the warmth of human interaction, supercharged with the speed and accuracy of artificial intelligence.

"For years, the idea of reshaping customer support has been close to my heart. But I never wanted to merely add to the growing list of generic support companies; there are hundreds out there. My vision for Plugin Support was to address the inherent challenges in customer service by harnessing the power of technology. It's never been about just throwing more money or manpower at the issue. It's about innovating, about finding smarter, more efficient ways to serve customers. Today, with the integration of AI and human expertise, we're not just solving a problem; we're setting a new industry standard."

Lyron Foster, Founder & CEO, Plugin Support

"With the festive season around the corner, businesses are under immense pressure to scale their support without compromising on quality," said Mr. Foster. "Plugin Support is our answer to this challenge, ensuring that every customer query is met with unparalleled efficiency and care."

Platform Highlights:

Ready in 60 Seconds: Experience the fastest onboarding in the industry. Businesses can integrate and set up Plugin Support in under a minute, making it perfect for those looking to amplify their support channels in the face of holiday traffic.

Human + AI Assistance: As agents communicate with clients, an intuitive AI constantly offers real-time suggestions, ensuring customers receive rapid, accurate, and personalized responses.

Transparent Pricing: With a unique pay-per-minute model, businesses only pay for actual usage, ensuring cost-effectiveness without hidden charges.

Recognizing the financial strains many businesses face during the holiday season, Plugin Support is offering a limited-time incentive: new clients will receive a \$200 free credit to test out the platform. Moreover, in anticipation of the official launch, Plugin Support is now accepting pre-registrations. Businesses that pre-register will benefit from an additional \$50 in credit to further evaluate the game-changing service.

"We're confident in the value Plugin Support offers," added Mr. Foster. "These credits are our way of inviting businesses to experience this revolution firsthand, without any initial investment."

Businesses keen on revolutionizing their customer support in time for holiday sales are encouraged to seize this limited-time offer. With Plugin Support, this festive season promises not only increased sales but also happier, more satisfied customers.
