

Prime Dental: Have a Prime dental experience

Dentist

Plano, Texas Oct 9, 2023 ([Issuewire.com](https://www.issuewire.com)) - A dental implant might be a good option if you've lost a tooth or teeth due to periodontal disease, injury, or other reasons. This involves inserting a titanium post beneath the gum line and into the jawbone, similar to a tooth root. The implant is a sturdy foundation for replacement teeth that can be fixed or removable. Titanium is a biocompatible material accepted by the body and can fuse directly to bone through osseointegration. It's crucial to engineer the implant to maximize its surface area-to-bone contact. [Dental Implants in Plano](#) are a safe and effective replacement for the tooth root and can help restore the foundation of a natural tooth.

At Prime Dental, our dedicated team strives to impact people's lives every day positively. We are passionate about our work and understand the importance of transforming a patient's smile and easing discomfort. Our values of integrity, teamwork, and clinical excellence are at the forefront of everything we do, and we are committed to providing our patients with the highest quality of care. We genuinely care about our patients' experiences, consistently maintaining our standards and delivering exceptional service. In short, we take pride in our work and genuinely care about the well-being of all our patients. Our [Plano dentist](#) has received extensive training in complex procedures, including tooth removal, root canal treatment, and conscious oral sedation.
