

Conor Perrin, DDS, a Dentist with The Tooth Co.

Get to know Dentist Dr. Conor Perrin, who serves patients in Irvine, California.

New York City, New York Nov 21, 2023 ([Issuewire.com](https://www.issuewire.com)) - Dr. Perrin, a general and cosmetic dentist, is the owner of The Tooth Co. in Irvine, California. His passion for esthetic-based digital dentistry has established him as a regional leader and guides his approach to patient care through the incorporation of heavily researched cutting-edge technologies.

Having taken meticulous detail in handcrafting a bespoke experience in the comfort of Orange County's

most stylish practice, Dr. Perrin fashioned it after an inviting hotel lobby. Consultations begin by carefully listening to and discussing all concerns and expectations, while developing a plan for treatment based upon a thorough head, neck, and oral examination.

Dr. Perrin prides his attentive and customized one-on-one approach on a testament to never rushing or double booking a session while providing honest and thorough treatment recommendations. To further elevate one's visit to The Tooth Co., he has devised a novel patient "comfort menu" with selections ranging from warm lavender-scented towelettes to anti-anxiety drops all in the solace of a private suite.

While pursuing his undergraduate studies at the University of Southern California, Dr. Perrin was accepted into USC's competitive Dental Hygiene/DDS Pathway Program.

During his training at USC, he was drawn to Dr. Pascal Magne's study of Biomimetic Dentistry, a practice of dentistry centered on minimally invasive techniques using materials that emulate the physical properties of natural dentition. His eventual presidential leadership and involvement in the Biomimetic Restorative Dentistry Study Club, international philanthropy in Nicaragua, Panama, and The Philippines, along with a diverse cosmetic portfolio, earned him the largest merit-based scholarship at the University before graduating as valedictorian of his dental class.

Dr. Perrin's academic journey as a double Trojan instilled a pursuit of clinical excellence, research, and expanded educational opportunities. He actively participates in membership with the Academy of Cosmetic Dentistry and the Academy of Biomimetic Dentistry.

While perfecting his porcelain and bonded veneer techniques at various cosmetic mini-residencies, Dr. Perrin was drawn to how a digital dentistry workflow could vastly improve one's experience. The incorporation of scanners, 3D printers, and special imaging units enables a patient to test-drive and, and after, receive his or her new smile with accuracy, efficiency, and beauty.

With a clear vision of returning to Orange County to establish his practice, Dr. Perrin fulfilled this goal in early 2023. He prioritized ongoing education, making substantial investments in courses to deliver the most current and meticulous care to his patients.

Dentistry, also known as Dental and Oral Medicine, is a branch of medicine that consists of the study, diagnosis, prevention, and treatment of diseases, disorders, and conditions of the oral cavity. Dentists diagnose and treat dental issues and help patients develop better oral hygiene regimens. They clean teeth, correct bite issues, perform surgeries, create beautiful smiles, and perform other duties to ensure that the teeth and mouth are healthy.
