

E-Corp Holdings Enters Med-Tech Sector with Launch of Best Surgeons Latin America

Los Angeles, California Nov 23, 2023 ([IssueWire.com](https://www.issuewire.com)) - E-Corp Holdings, a global IT development firm, today announced its entry into the med-tech sector with the launch of Best Surgeons Latin America, a technological platform for patients to discover the top surgeons in their area.

Best Surgeons Latin America is a patient-driven ecosystem built upon the E-Corp Silverlake data analysis platform. It gives patients the power to determine which surgeons are the most recommended, encouraging transparency and excellence in medical care.

Patients can use the platform to search for surgeons by specialty, location, and other criteria. They can also read and leave reviews of surgeons, and view ratings based on factors such as experience, success rates, and patient satisfaction.

“We are excited to launch Best Surgeons Latin America and help patients make informed decisions about their healthcare,” said Ramon Castro, CEO of E-Corp Global. “Our platform gives patients the power to choose the best surgeons for their individual needs, and it encourages surgeons to strive for excellence.”

Best Surgeons Latin America is currently available in beta version in select countries in Latin America. It will be rolled out to additional countries in the coming months.
