

Introducing the Ultimate Corporate Travel and Expense Management Solution: TESS360

Gurgaon, Haryana Nov 15, 2023 ([Issuewire.com](https://www.issuewire.com)) - Heuristics Informatics Pvt Ltd is thrilled to announce the launch of their cutting-edge SaaS-based corporate travel and management solution, TESS360. TESS360 is a comprehensive corporate travel tracker and expense management solution that streamlines and simplifies every aspect of business travel. With its user-friendly interface, powerful features, and cost-effective pricing, it is the ultimate tool for businesses looking to optimize their travel

and expense management processes.

Understanding Corporate Travel Expense Management Software

If your employees travel frequently for business, your HR team has an uphill task to track down countless flights, hotels, ground transportation, and food vendors. As travel expenditure varies each month, without the right [travel expense reimbursement](#) tools in place, your organization indulges in a lot of time-consuming manual work and potential errors from manual processes.

Currently, 43% of organizations still rely on manual expense reports. Not only are manual processes slow, but they are prone to errors and lost paperwork. Slow T&E processes affect everyone in your business - from finance teams, to travel managers and the travelers themselves.

Your workforce deserves faster expense management & [travel processes](#), so they can spend less time on manual operations and more time on business goals. This gives you a reason to use modern expense management tools that streamline and automate expense management. Travel reimbursement automation refers to a 100% digitized process that pulls information automatically so anyone can create, send, and process requirements quickly.

TESS360 – the online travel companion

TESS360 is more than just a business travel management app – it's a synchronous workflow solution that empowers businesses to optimize their processes, enhance efficiency, and make informed decisions. By unifying travel booking, expense tracking, policy compliance, and reporting, TESS360 paves the way for a new era of seamless, coordinated, and successful travel and expense management.

Some noticeable features that make TESS360 the best business travel management app, include:

Corporate Travel Tracker: Track your employees' travel in real-time with advanced GPS integration, allowing you to monitor their whereabouts and ensure their safety.

Expense Management: Effortlessly manage and approve travel expenses, ensuring compliance with company policies and reducing the risk of fraudulent claims.

Customized Reporting: Generate detailed reports and gain valuable insights into your company's travel expenses, helping you make data-driven decisions to cut costs and improve efficiency.

Travel Policy Compliance: Enforce corporate travel policies with automated alerts and notifications, reducing unauthorized expenditures and enhancing accountability.

Seamless Integration: Our SaaS-based solution easily integrates with popular accounting and HR software, ensuring a smooth and hassle-free experience for your finance and HR teams.

TESS360 is designed to meet the unique needs of businesses in today's fast-paced, global environment. Whether your organization has a small team or a large workforce, our app can be configured to suit your specific requirements.

- Murali Mohan, Managing Director of Heuristics Informatics Pvt Ltd, expressed his enthusiasm for the app, stating, "TESS360 will be a game-changer for companies that value efficiency, cost-savings, and real time availability. Our corporate travel expense management solution is backed

by cloud technology and a dedicated support team, ensuring that businesses can focus on what they do best while we take care of their travel and expense management processes."

The launch of TESS360 comes at a time when businesses are increasingly looking for digital solutions to simplify operations and improve compliance. By centralizing travel tracking and expense management, this SaaS-based solution is poised to reduce operational costs, minimize errors, and enhance employee satisfaction.
