

StreamFab Announces the Release of Its New Product, StreamFab TikTok Downloader

StreamFab has launched StreamFab TikTok Downloader, a convenient solution to seamlessly watch your favorite TikTok videos offline in high-quality 1080p in MP4/MKV format with AAC 2.0 audio.

Arcadia, New York Nov 29, 2023 ([IssueWire.com](https://www.issuewire.com)) - TikTok videos are entertaining people across the globe. In response, StreamFab has introduced StreamFab TikTok Downloader, a versatile software that empowers users to download and save offline their chosen TikTok videos without hassle. Undoubtedly, its top-notch features make it an ideal solution for a seamless offline streaming experience.

About StreamFab TikTok Downloader

StreamFab TikTok Downloader is a reliable, safe, and feature-rich software that enables users to download their desired TikTok videos from all regional sites and save new TikTok videos at the scheduled time. It is the industry's leading downloader solution with a download function that bypasses all TikTok download limitations.

Key Features and Highlights of StreamFab TikTok Downloader

StreamFab TikTok Downloader provides a wide array of top-notch features to help users download their chosen TikTok videos and enjoy them offline on their own terms. The program boasts a user-friendly interface with advanced features. So, its ease of use enables users to try it and settle with the program in the long run.

1. Features a Built-in Browser for a Better Downloading Experience
2. Offers Excellent Downloading Quality and Saves in MP4 and MKV
3. This [TikTok Downloader](#) offers H.264 and H.265 video codec versions
4. Enhance Video and Audio Quality to 4K and EAC3 5.1 with UniFab
5. Schedule Mode and Automatic Downloads
6. Automatically Transfer Downloaded Videos to DVDFab Blu-ray Creator

Operation Steps of StreamFab TikTok Downloader

Developers have created the StreamFab TikTok Downloader in a way that offers ease of use to beginners and professionals alike. The program comes with a built-in TikTok WebPlayer, making it accessible to all TikTok users. Even the downloading process is straightforward and involves only a few clicks.

Step 1: Install StreamFab and launch the StreamFab TikTok Downloader from the left column. You can easily find TikTok under the **Popular Video Sites** section under the **Home** tab.

Step 2: Search and play a video from TikTok. Streamfab will automatically analyze it.

Step 3: Adjust the video's output parameters like Video Codec, Resolution, Download as, etc., to proceed with the download.

Step 4: Download the selected TikTok video immediately by clicking the Download Now button or add them to the Downloading Queue to save them offline later.
