

What is Young Browns? Complete history so far!

Delhi, India Nov 7, 2023 ([IssueWire.com](https://www.issuewire.com)) - **Young Browns** is an initiative by some of the talented artists who want to spread the desi rap scene all across the globe.

It was initially a duo of two immigrants Skaii and Jashan who were living out of their country and wanted to give an identity to their culture through their art form.

Then they discovered Diamstrom (Currently Ynb Sapera), another exceptionally talented artist filled with the compassion of music. Soon the duo turned into a trio together they formed the OG YNB which

created several top-notch tracks. They were also working with some other talented artists, such as Yamraj (Currently Sparky) who is another talented rap artist who is known for his lyricism.

Everything was going well until a dispute happened between two artists, which led to the separation of the YNB.

Then everyone got busy in their life and in making their solo career.

Everyone thought that YNB was over until a new character came into the frame, he was none other than Barking Rayan. Rayan was in contact with Sapera, and they were working on some projects together.

Then they decided to work on a collab song named "[Love Me](#)".

After some days Sapera introduced Rayan to Skaii and Yamraj and they all thought to work on a common track. Eventually, they talked and discussed reviving the YNB again all of them agreed and they started YNB right from scratch. The track "Love Me" was a hit for them both regarding views and streams.

After this, they dropped many such amazing songs because of which many talented artists discovered them, and they discovered many talented artists such as Lekhak and Peace who are currently members of Young Browns.
