

Ana Costa, MD, an Anesthesiologist with the Renaissance School of Medicine at Stony Brook University

Get to know Anesthesiologist Dr. Ana Costa, who serves patients in Stony Brook, New York.

New York City, New York Dec 21, 2023 ([Issuewire.com](https://www.issuewire.com)) - Dr. Costa practices general anesthesiology with a focus on neurosurgical and neurovascular procedures. Her significant contributions extend beyond clinical practice as she holds the positions of Associate Professor and Associate Residency Program Director within the Department of Anesthesiology at the Renaissance

School of Medicine at Stony Brook University.

In this capacity, Dr. Costa designs curricula, performs quality improvement projects, and educates residents throughout their anesthesiology training. A true advocate for the success of her mentees and residents, she takes genuine pleasure in reconnecting with them and celebrating their numerous achievements.

Graduating with her Medical Degree from Weill Cornell Medical College in New York, Dr. Costa went on to perform her residency at NewYork-Presbyterian/Weill Cornell Medical Center.

Subsequent to her education, she attained board certification in anesthesiology through the American Board of Anesthesiology (ABA). The ABA sets standards and exams for the accreditation of board-certified anesthesiologists coming to the end of their residency. It is one of the 24 medical specialty boards that constitute the American Board of Medical Specialties.

On the professional front, Dr. Costa is an active member of the American Society of Anesthesiologists and holds the distinguished status of a senior member and Chair of Admissions of the Donoho Academy of Clinical and Educational Scholars. Her trajectory to success is attributed to her diligent efforts, unwavering dedication to her work, and the invaluable guidance provided by mentors who have played a pivotal role throughout her journey.

Anesthesiology is the medical specialty concerned with the total perioperative care of patients before, during, and after surgery. It encompasses anesthesia, intensive care medicine, critical emergency medicine, and pain medicine. Anesthesiologists have the primary responsibility of monitoring the patient's vital signs during surgery. In addition to basic measurements such as pulse, blood pressure, and temperature, they measure the patient's respiration.
