

Consultivo Unveils AagniSafe V 2.0, Elevating Fire Safety Audits with Industry Sector Customisation & Advanced Features

Empowering Organisations with Tailored Fire Safety Solutions: AagniSafe Version 2.0 Introduces Industry-Specific Customisation and Enhanced Features for Comprehensive Safety Audits.

consulting services, has announced the release of *AgniSafe* Version 2.0, the latest version of its fire safety maturity level-based scored audit protocol.

AgniSafe was first introduced in September 2016 as FireMap 1.0 and has since undergone field data validation through hundreds of fire safety audits and fire risk assessments.

The updated version, *AgniSafe* Version 2.0, comes with advanced features like industry sector customization, which will provide customers with even more value from its risk-based output.

The FireMap protocol is designed to help organizations of all types and sizes evaluate their fire safety systems in a comprehensive and objective manner. With *AgniSafe* Version 2.0, customers can now customize the protocol to their specific industry sector, ensuring that their fire safety systems are tailored to their unique needs.

“We are excited to announce the release of *AgniSafe* Version 2.0,” said Ms Madhabi Guha Basu, Director Sustainable Solutions for Consultivo. “This latest version of our fire safety maturity level-based scored audit protocol is a testament to our commitment to providing our customers with the most advanced and effective safety consulting services available. With industry sector customization of *AgniSafe* Version 2.0, our [Fire Safety Audits](#) will help our customers achieve even greater levels of safety and security.”
