

Dayanand Institution Unveils Cutting-Edge RAISE Centre of Excellence with MIT Square London

Bengaluru, Karnataka Dec 6, 2023 ([Issuewire.com](https://www.issuewire.com)) - Dayananda Sagar Academy of Technology and Management (DSATM), Bengaluru, with [MIT Square London](https://www.mit-square.com) proudly announces the launch of its groundbreaking RAISE Centre of Excellence, aimed at spearheading advancements in Research, Applications, Innovation, Science & Technology, and Entrepreneurship. Situated at the heart of the campus, this state-of-the-art facility is envisioned to be a catalyst for groundbreaking discoveries and transformative innovation in various fields.

Dr. M. Ravishankar (Principal) expressed his interest in the Centre of Excellence focussing on research and innovation. Dr. Nandini Prasad KS (HoD-ISE and Dean-Foreign Affairs) has been appointed as the director of this pioneering initiative. With a wealth of experience and a passion for pushing the boundaries of knowledge, she will be playing a key role. Dr. Lokabhiram Dwarakanath (Ass. Professor-ISE) expressed enthusiasm for the centre's potential to drive impactful change and breakthroughs in various domains.

Ms. Bhuvaneshwari Loganathan (Co-founder & COO of [MIT Square](https://www.mit-square.com), Asia) was invited as the chief guest. "We are thrilled to embark on this journey of innovation and discovery. Our goal is to foster an environment where brilliant minds converge, ideas flourish, and solutions to some of the most pressing challenges in various domains are addressed," remarked Ms. Bhuvaneshwari during the inauguration ceremony.

Dr. Mithileysh Sathiyarayanan, a young dynamic CEO & Scientist at [MIT Square](https://www.mit-square.com) London, embodies

the essence of collaboration and philanthropy. His dedication to global collaboration has not only amplified the impact of countless projects but has also brought together diverse minds, fostering innovation and progress. As a collaborator, Dr Mithileysh has a unique gift for uniting people, breaking down barriers, and transforming shared visions into reality.

The RAISE Centre of Excellence will focus on a multi-disciplinary approach, encouraging collaboration between various departments within the institution and fostering partnerships with industry leaders and research institutions worldwide. This collaborative model aims to accelerate the pace of innovation and address complex problems in all fields.

The centre's initial projects include Smart Helmets and Smart Kitchens highlighting its commitment to tackling real-world issues and driving societal impact through research and development.

The launch of the RAISE Centre of Excellence marks a significant milestone for DSATM, underscoring its position as a hub for cutting-edge research. As the centre begins its journey, expectations are high for the groundbreaking discoveries and advancements that will emerge, shaping the future of our world in profound ways.
