

K&K Windows Introduces Innovative Sash uPVC Windows to its Product Line

K&K Windows sets itself apart by diversifying its range of uPVC-fabricated windows.

Wexford, Ireland Dec 6, 2023 ([Issuewire.com](https://www.issuewire.com)) - Admirers of traditional décor can now explore a unique array of sash window styles at this destination and enjoy rendering a distinguishing look to their properties. Captured here are their key features and benefits.

Only a few fabricators and installers of [uPVC doors](#) and windows offer an array of choices. K&K Windows is one of them. In a recent interview with the company CEO, the individual proudly announced its decision to introduce sash windows to its collection. Let us hear everything in detail.

A quick look at the collection of uPVC fabricated windows will reveal that they mostly feature designs ideal for modern décor. As heard from the Managing Director (MD), they are now exploring alternatives with a more traditional appeal. The introduction of the sash window style speaks volumes about the same.

What Makes the Sash uPVC Windows of K&K Impressive?

Sash designs, as we all recognise, have a distinctive design aesthetic. It takes lifting the frame vertically to operate the windows. It's no wonder they are more common in settings where opening them can be challenging for fear of getting in the way of someone or causing an obstruction. According to the design specialist at K&K Windows, "Apart from the inherent strengths, our sash windows are of better quality, pleasant-looking, and brimming with innovative features." The ones differentiating our products from others are captured below:

- Glazed internally
- Triple chambered profile
- Features an authentic look with decorative horns
- Fabrication from only top-quality uPVC frames
- Long-lasting
- Inward tilt for easy external cleaning
- Triple-weather seals
- Air-tight, guaranteed by its EuroSash sealing system
- Georgian style
- Reinforced for added security

How Does Sash Windows from K&K Windows Benefit Homeowners?

On questioning the same to one of their installers, we discovered the following benefits to properties:

- Thermal insulation since the [uPVC windows](#) are double-glazed
- Lowest exposure to draughts as they guarantee a bespoke service to accompany their great sash products
- Almost maintenance-free

"You only need to wipe the sash windows occasionally to keep them clean", said the head installer of K&K Windows.

From the facts revealed, isn't it evident that the sash windows of this company are a flawless combination of durability, aesthetics, and energy efficiency? They sure are, and surprisingly, they are available for purchase and installation. You may schedule a consultation with its team to seek more information.
