Quantum Products LLC is Producing and Marketing 99.5% USP Kosher High-Quality Glycerin

3020 Beaumont St. Liberty, TX 77575

Quantum Products LLC proudly unveils the initiation of **USP and Kosher-certified 99.5% and above high-quality glycerin production at its cutting-edge facility located at 3020 Beaumont St. in Liberty, Texas**. Utilizing an advanced multi-stage process featuring patented vacuum and dilutive distillation units, centrifuges, filter systems, and state-of-the-art process control systems, Quantum Products is set to become a key supplier of premium glycerin.

Exceptional Quality and Certification:

Our plant processes a variety of feed materials, including soybean, palm, and other plant-based sources, ensuring a **steady supply of clean glycerin, 99.5% and above**. Quantum Products is committed to delivering glycerin of exceptional marketable quality, **with all products Kosher and USP-certified**. The production line will include food-grade, cosmetic-grade, and medical-grade glycerin, reinforcing Quantum Products' dedication to meeting diverse industry needs.

Strategic Location and Logistics:

Quantum Products strategically chose Liberty, TX, as its production site due to its prime location with efficient freight links. Equipped with railcar loading and unloading capabilities and situated near major interstate highways, our facility ensures seamless inbound feed and outbound product transportation. In close proximity to international ports in Baytown, TX, our company is poised to import higher-quality feed materials when needed.

Diversification and Flexibility:

We are open to supplying variable quantities, ranging from drums and totes to truckloads and railcars. With a storage capacity designed to meet market demands, Quantum Products is well-positioned to expand its reach and cater to a broader customer base. We expect to set competitive pricing in the marketplace, further enhancing our value proposition.

Opportunities:

Quantum Products invites discussions with potential suppliers interested in providing glycerin feed materials and customers looking to purchase finished glycerin products. We are not limited by geographical or volume constraints and welcome inquiries from all interested parties.
