

Tuscany Dental Centre Uses Swiss-Made IQAir Purifiers to Ensure Clean and Safe Air for Patients and Staff

Tuscany Dental Centre, a dental clinic in Calgary, is proud to announce that it has installed IQAir purifiers in its office to provide the highest level of air quality and safety for its patients and staff.

Calgary, Alberta Jan 2, 2024 ([Issuewire.com](https://www.issuewire.com)) - Tuscany Dental Centre, a dental clinic in Calgary, is proud to announce that it has installed IQAir purifiers in its office to provide the highest level of air quality and safety for its patients and staff.

IQAir is a Swiss company that produces the world's most advanced air purifiers, using the highest quality components and state-of-the-art manufacturing processes. IQAir purifiers are certified to filter out 99.97% of airborne particles down to 0.003 microns, the smallest particles that exist. This includes viruses, bacteria, dust, pollen, mold, and other pollutants that can affect health and well-being.

Tuscany Dental Centre has chosen IQAir purifiers because they meet the MERV16 standard, which is the highest rating for air filtration efficiency. MERV stands for Minimum Efficiency Reporting Value, and it measures how well an air filter captures particles of different sizes. MERV16 filters are able to capture

more than 95% of particles in the 0.3 to 1 micron range, which are the most difficult to filter.

By using IQAir purifiers, Tuscany Dental Centre is able to ensure that the air in its office is clean and safe, especially during the COVID-19 pandemic. The purifiers also help to reduce odors, allergens, and chemical vapors that can affect the comfort and satisfaction of patients and staff.

Dr. Cam Brauer, the principal dentist of Tuscany Dental Centre, said: “We are committed to providing the best dental care for our patients, and that includes ensuring a healthy and hygienic environment for them and our staff. We are very impressed by the quality and performance of IQAir purifiers, and we are confident that they will help us achieve our goal of excellence in dentistry.”
