Sorghum and millets, among the first grains cultivated by humanity, offer a myriad of health benefits, as supported by published research. From reducing inflammatory disease effects to promoting heart health and exhibiting anti-diabetic and anti-carcinogenic properties, these grains are nutritional powerhouses.

Beyond their health benefits, sorghum and millets are champions of sustainability. Drought-resistant and utilizing significantly less water than comparable grains, they contribute to soil health, carbon sequestration, and biodiversity in agricultural systems.

Author Nate Blum’s inspiration for The Sorgho Squad series is deeply rooted in a passion for improving regional food systems, combating hunger, and fostering environmental and economic sustainability for rural communities.
