

BarCloud Enhanced Their Inventory Tracking and Asset Management System to Include Funding Source Tracking and Reporting

New Interactive Report for Funding Sources, Perfect for School Inventory and Asset Management

New York City, New York Jan 23, 2024 ([Issuewire.com](https://www.issuewire.com)) - BarCloud is excited to bring a brand-new report to its users. As a leader in inventory and asset tracking software for schools, the company developed and released an innovative report in their system after hearing from customers in the education sector about the need for an easy way to track the funding sources of their items. This Funding Source Report simplifies funding source tracking with an interactive user interface to monitor spending on school supplies and equipment.

It allows users to effortlessly select and monitor funding sources, providing a comprehensive view of their asset spending. While originally intended for customers in the education field, this report is perfect for any organization that needs to keep track of funding sources and their usage.

Featuring an intuitive design, the interactive report offers a seamless workflow, making it easy for users to select any funding source logged into the system and analyze where the funds are used. This report allows users to gain insights into the amount spent on each item from a specific funding source, enhancing accountability.

This inventory tracking and asset management report benefits users with:

- **Comprehensive Resource Overview:**
Organizations receive a holistic view of their resources, facilitating optimal allocation for enhanced utilization.
- **Transparency for Stakeholders:**
The report enhances transparency, simplifying compliance with any requirements related to public funding or grants, a particularly valuable feature for educational institutions.
- **Financial Planning and Control:**

Insights into spending patterns on inventory and assets aid in financial planning and control, allowing for a more strategic and efficient use of resources.

- **Proactive Resource Management:**
By identifying trends in resource usage, the report helps prevent shortages of materials or equipment, ensuring uninterrupted operations.

“We developed this report to help ease the manual tasks involved in budget allocation for our customers,” said Tim Laurin, a representative of the company. The new custom report is now available in the latest version of the Inventory Software and Asset Management System.

[BarCloud](#) is a market leader in Inventory System and Asset Tracking Solutions that uses [Barcode technology](#) with mobile Barcode, smartphones, and tablets. They help improve profitability by eliminating manual data entry, paper files, and forms and by automating record keeping. With their powerful system, businesses have 24/7 access to the location and status of their Inventory and Assets, whether they are in the warehouse, on the field, or in the office. They have offices in California (headquarters), and Chicago.
