

Claim up to €2,100 for Switching to Solar Energy in Mayo with WestQuay Energy's SEAI Grants Support

WestQuay Energy, the leading SEAI registered solar panel installers in Co. Mayo, is delighted to announce their SEAI Grant support for solar PVs and EV chargers.

Westport, Mayo Jan 31, 2024 ([Issuewire.com](https://www.issuewire.com)) - The firm has ensured the best resources to help homeowners, businesses, and communities offset the costs of switching or upgrading to [solar energy in Mayo](#) with tailored renewable energy solutions.

Meet the friendly team of solar PV experts at WestQuay Energy, who have carved a niche for supplying tailored solutions for [solar energy in Mayo](#). As a SEAI-registered installer of solar PV systems, WestQuay Energy can be your trusted partner for SEAI application support and BER assessments, all in one place.

"WestQuay were efficient and did a very clean job of installation with minimal disruptions," reads a top Trustpilot review of a previous customer of WestQuay Energy.

Their prestigious clientele includes AOMalley Carpets & Furniture, EngineRe, and 6th Sense Global Designs. The company works with individual homeowners and commercial and [agricultural PV installations in Mayo](#) and several other parts of Ireland.

All About SEAI Grants Mediated by WestQuay Energy

Over 140 countries are placing high hopes on renewable energy installations to accomplish the Net-Zero goals for 2050. Ireland is completing the stance with an annual growth rate of 3.61% in solar PV installations and 13.5% renewable energy share (RES). The nation must obtain greater statistical transfers of renewable energy.

A range of attractive grants and schemes devised by the Sustainable Energy Authority Ireland (SEAI) have been a life force to drive Irish homeowners and communities to think beyond the grid and start their journey towards an energy-efficient future.

The grants offer a subsidy, where the consumer has to pay the upfront costs, and the

Several different schemes under this grant apply to specific consumers, whether homeowners, businesses, or farms. Below are the SEAI grants that you can apply for via WestQuay Energy.

Homeowners: SEAI Home Grant is available for domestic [solar PV installations in Mayo](#) for homes built and/or occupied before January 1, 2021. The grants are offered in the form of subsidies and offer between €800 per kWp up to 2 kWp and up to €2,100 for a 4 kWp system or greater.

Non-Domestic Microgens: This grant helps businesses and the public sector get grant funding of up to 1000 kWp worth up to €162,600.

SEAI Electric Vehicle Home Charger: If you are buying an electric vehicle (EV) in Ireland, you can get a grant of up to €300 for installing a charging point in your home. This is only available for home charger units. WestQuay Energy serves as a Safe Electric registered contractor for its supply.

Accelerated Capital Allowance: this is a type of tax benefit available to traders, including sole traders, wholesalers, farmers, and companies that have invested in energy-saving technology for trading purposes.

TAMS for Farmers: The Targeted Agriculture Modernisation Schemes (TAMS) is a collective grant program offering a wide range of products to help Irish farmers build, improve, and develop farm buildings with specific equipment, including [solar PV installations in Mayo](#).

What Does WestQuay Energy Offer You As An SEAI-Registered Solar PV Installer in Co. Mayo

The big job of an SEAI-registered solar panel installer is to authorise the Declaration of Works for the applicant and carry out the PV installation according to the grant's guidelines.

"Oliver, the sales rep and energy specialist, is super nice and gave us a great overview of how it all works and what to do and not to do. He is very knowledgeable and thorough and very likable and trustworthy." concluded the Trustpilot reviewer.

WestQuay Energy, with its groundbreaking green energy solutions, goes the distance to give its clients the ample support they need between the conventional. The quintessential, approachable expert support that everyone yearns for.

WestQuay Energy ensures full adherence to the core elements and processes of the Quality Assurance and Development Programme (QADP) for the Solar PV Scheme under the Microgeneration Support Scheme (MSS).
