

Security Brigade Unveils New Version of ShadowMap – Security Ratings, Benchmarking & Third Party Vendor Risk Management

Security Brigade's latest ShadowMap platform enhances cyber defence capabilities, focusing on RBI compliance for banking sectors and mitigating growing supply chain risks. The new platform adds Security Ratings & Third Party Vendor Risk Management.

Mumbai, Maharashtra Jan 7, 2024 (Issuewire.com) - [Security Brigade](#), a leader in the cyber security field and a CERT-In Empanelled Cyber Security Consulting firm, today announced the launch of an updated version of their flagship product, [ShadowMap - Digital Risk Monitoring Platform](#). Since its establishment in 2017, ShadowMap has been pivotal in revolutionizing digital risk management and was awarded the Data Security Council of India's accolade for Most Innovative Product in Cyber Security.

The new version of ShadowMap brings significant enhancements in features like [Attack Surface Management](#), [Brand Protection & Takedown](#), [Dark Web Monitoring](#), Data Leak Detection & the Vulnerability and Threat module. Notably, it plays a crucial role in aiding Private and Cooperative Banks in adhering to the Reserve Bank of India's Cyber Security Frameworks for Banks, thus bolstering the financial sector's defense against cyber threats.

In response to the increasing concerns around Supply Chain Risk and Vendor Risk in technology sectors, ShadowMap's new features are tailored to address these challenges. By integrating Security Ratings & Industry Benchmarks, Vendor Risk Management, Third Party Risk Scoring and Threat Intelligence Feeds, ShadowMap aims to empower clients to proactively manage these risks, enhancing their own and their supply chain's security.

Yash Kadakia, Founder & CTO of Security Brigade, comments on this development: "In today's interconnected world, supply chain risk has become a critical concern. Our enhancement of ShadowMap, with features addressing these risks, reflects our commitment to evolve based on real-world customer needs and threat actor trends. The great part about a SaaS based Digital Risk platform like ShadowMap is that you can see immediate and tangible customer benefits when rolling out improvements."

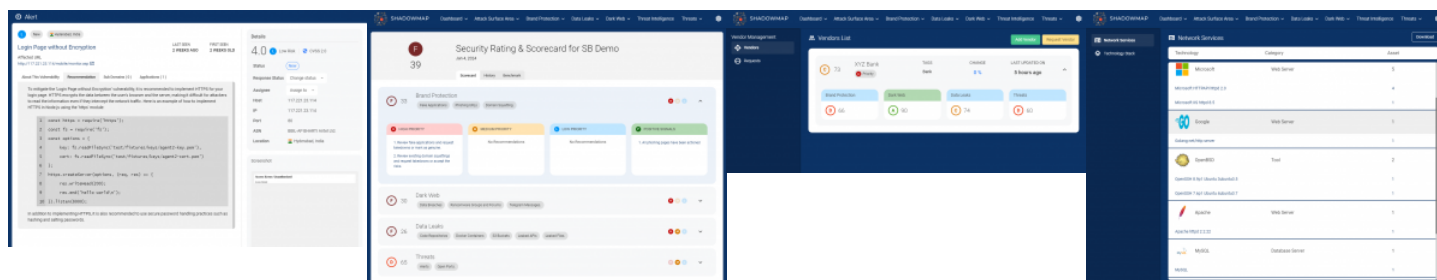

Furthermore, this version introduces a complete overhaul of the user experience, informed by comprehensive customer feedback. This redesign focuses on intuitive use and process efficiency, ensuring clients can fully leverage ShadowMap's capabilities.

Security Brigade, established in 2006, is a vanguard in cyber security, specializing in Red-Team Assessments, Security Audits, and Compliance services. The company's commitment to technical excellence and innovative solutions, augmented by AI and ML, positions it as an indispensable partner in the industry.
