

Amanda McKenzie, PA-C, a Physician Assistant with Yale New Haven Hospital

Get to know Get to know Physician Assistant Amanda McKenzie, who serves patients in Fairfield and Milford, Connecticut.

New York City, New York Feb 28, 2024 ([Issuewire.com](https://www.issuewire.com)) - Amanda is a certified Physician Assistant currently affiliated with Yale New Haven Hospital, specializing in treating patients with a wide range of neurological conditions. From strokes to multiple sclerosis, from headaches to movement disorders, she approaches each case with thoroughness and empathy. Her comprehensive understanding of the

nervous system allows her to provide tailored care to each patient, addressing their unique needs and concerns. Whether it's managing dementia, alleviating neuropathic pain, or navigating the complexities of neurological conditions, her patients benefit from her expertise and compassionate approach to healthcare.

Graduating with distinction, she earned her Bachelor of Science degree in Behavioral Neuroscience from Northeastern University. During her undergraduate years, she displayed an innate curiosity for understanding the complexities of human behavior and the underlying neurological mechanisms governing it.

After completing her undergraduate studies, Amanda transitioned into the field of emergency medical services, serving as an Emergency Medical Technician (EMT). Her time in this role equipped her with invaluable hands-on experience in responding to medical emergencies with precision and compassion. Additionally, she dedicated herself to supporting vulnerable populations as an advocate at a group home facilitated by the Department of Children and Families (DCF).

Driven by a desire to expand her knowledge and skill set in healthcare, Amanda pursued further education at the University of Bridgeport, where she obtained her Master's degree in Physician Assistant Studies.

A Certified Physician Assistant (PA-C) is a healthcare practitioner who practices medicine in collaboration with physicians. They examine patients, order and interpret diagnostic tests, perform necessary procedures, and prescribe medications. In most cases, they work under the supervision of physicians or surgeons, but they can work more independently in some states, rural areas, and inner-city areas, consulting with physicians only when they need help with cases.
