

Best CCTV Camera for Home Security

CCTV Camera Security installation

Mumbai, Maharashtra Feb 13, 2024 (Issuewire.com) - Best CCTV Camera for Home Security

When it comes to home security, we suggest always go with the WIFI camera incase budget is very limited. You can also install wired camera which have at least five year of life and very much durable.

What is needed for WIFI camera?

- 2MP camera any brand
- Memory card with minimum of 64 GB (for 15 days backup)
- A power socket to connect your camera with the help of adapter which comes with the purchase of camera.
- A Wi-Fi connection is required (Either JIO or Airtel Dongle or Cable Operator internet setup with a mandatory WIFI router).

Wi-Fi Camera drawbacks – for any reason if you are installing camera outdoor then there might be chance a visitor can tamper the camera or he might plug out entire camera. And in some cases visitor can remove the memory card for his own purpose and you won't be having any proof of who did this.

Wi-Fi Camera Positive Side – Its come with affordable price and very easy to install. Hardly it will cost around 4000/- for entire setup including your 2MP camera along and 64 GB memory card with including installation cost. Very easy to configure with your mobile app to keep watch on in-house or outdoor activity on your mobile app.

What is needed for Wired Setup ?

HD Camera Requirement –

- HD Camera
- DVR Machine (Where Recording gets Stored)
- Power Supply
- BNC Connector
- DC Connector
- Harddisk
- 2 U/4 U Rack

- 1 Copper cable
- Mike Incase required
- Lan cable & HDMI/VGA Cable

IP Camera Requirement –

- IP Camera
- NVR
- POE Switch
- Cat 6 Cable
- RJ 45 Connector
- 2U/4U rack
- Harddisk
- Lan Cable & HDMI/VGA Cable

Wired Camera Drawbacks – If house is concealed then probably wire can be hide internally and setup will looks good. However if house or office is not concealed then wire will visible to all and that's look little weird. Its completely depend on house owner what exactly he wants. Few drilling will be required, connecting TV with your DVR machine with [HDMI cable](#) (you can ignore incase you don't want to watch it on TV or LCD), Additional space would be required to keep DVR machine at safe place.

Wired Positive Sign – There is no look back at least for 5 years after setup and very minimum maintenance is required. Where Wi-Fi setup required more attentions like Wi-Fi password reset issue, offline issue, camera stops moving left and right, pan and tilt.

[Below are our few best WIFI Camera That you should BUY!](#)

CP-UNC-PT30L1-VMW 3MP

CP PLUS Intelligent Home PT Camera with Cloud Remote Viewing – 1080 Full HD , Wireless / Wi-Fi, 360 Degree Viewing , Motion Detection, Two Way Communication , Superior Night Vision , Pan- Tilt option, SD Card Slot.

[For Wired Device, Below are our few brand which will give you best results –](#)

- CP plus – India's best and cheapest rate camera with excellent service across India. Easily available across India. Your vendor may ask you to offer other bands but ask for CP Plus setup because they gets huge margin on China camera's that why they might force you to go for other brands.
- Hikvision – Hikvision camera's are slightly costlier than CP Plus, but quality is almost similar to CP plus however some feature are additional added in Hikvision like connecting fire alarm, hooters, etc.
- Active Pixel – Quality of active are also good but go for higher configuration like 5mp camera setup other wise 1 MP & 2 MP are not that effective.
- Honey bell – Extremely expensive compare to other brands like Hikvision & CP Plus but far better quality than all brands. For home and office, we advise not to install incase budget is limited.
- Dahua – Dahua is a parent company of CP Plus hence quality and price are almost same and excellent in service.
- Secure Eye – Very cheap in price and quality is average. User looking to camera for very basic requirement then we suggest install secure EYE.
- Core Prix – Recently took shape in market and doing well. Their price and quality is above average and cheaper than CP Plus & Hikvision but clarity of camera is good. However service across India seems average.
- Zicom – Zicom is Indian based company quite expensive than CP Plus & Hikvision but have more feature in their setup. Worth to Install incase budget is not a problem.
- Samsung – Very expensive but great quality, Metro Rail, Airport and other prime location are Samsung Camera. If it is affordable then go for it.
- Panasonic – Mid range expensive but is good. Camera quality is excellent and slightly affordable but 2X expensive than CP plus & Hikvision.
