

Cognicert Limited Introduces Groundbreaking AI Management System Lead Auditor Course Following ISO's New Standards

Cognicert ISO 42001:2023 Artificial Intelligence Management System Lead Auditor Course

London, United Kingdom Apr 11, 2024 ([Issuewire.com](https://www.issuewire.com)) - Cognicert Limited Introduces Groundbreaking AI Management System Lead Auditor Course Following ISO's New Standards

Cognicert Limited, a leading provider of certification and training solutions, is thrilled to announce the launch of its pioneering ISO 42001:2023 Artificial Intelligence Management System Lead Auditor Course. This course comes in response to the recent release of new standards by the International Organization for Standardization (ISO) aimed at providing adequate systems to manage the artificial intelligence sector.

As AI technology continues to advance rapidly, there is a growing need for organizations to effectively manage and audit their AI systems to ensure compliance, reliability, and ethical use. The new ISO standards address these concerns by outlining comprehensive guidelines and requirements for the management of AI systems across various industries.

Cognicert's ISO 42001 AI Management System Lead Auditor Course is designed to equip professionals with the knowledge, skills, and tools necessary to effectively audit and assess AI management systems in accordance with the latest ISO standards. Participants will gain a deep understanding of key concepts such as AI governance, risk management, data privacy, and ethical considerations.

"We are excited to launch our ISO 42001 AI Management System Lead Auditor Course in response to the evolving needs of organizations in the AI sector," said Gift Syvester, Partnership Development Manager at Cognicert Limited. "This course will empower professionals to play a crucial role in ensuring the responsible and compliant use of AI technology within their organizations."

The comprehensive curriculum of the course covers a range of topics including:

- Overview of ISO standards for AI management systems
- Principles of AI governance and ethics
- Risk assessment and mitigation strategies
- Data privacy and security in AI systems
- Auditing techniques and best practices

Participants will have the opportunity to learn from industry experts with extensive experience in AI management and auditing. The course combines theoretical knowledge with practical exercises and case studies to provide a hands-on learning experience.

Upon successful completion of the course, participants will receive a certification as an ISO 42001 AI Management System Lead Auditor from Cognicert Limited, demonstrating their expertise and proficiency in auditing AI systems to ISO standards.

For organizations seeking to enhance their AI governance and compliance capabilities, Cognicert's AI Management System Lead Auditor Course offers a valuable opportunity to upskill their workforce and

ensure adherence to the latest industry standards.
