

Read Web Text in Color: Datumtron Corp Launches Synhix, Bringing Proven Syntax Highlighting Benefits to Web Reading

Datumtron Corp today unveiled Synhix, a pioneering Chrome extension designed to revolutionize the way users read text on the web.

Normal

Earth is the only planet in the Solar System whose English name does not come from Greek or Roman mythology. The name was taken from Old English and Germanic. It simply means "the ground." There are, of course, many names for our planet in the thousands of languages spoken by the people of the third planet from the Sun.

New York City, New York Feb 13, 2024 ([IssueWire.com](https://www.issuewire.com)) - Datumtron Corp, at the forefront of AI technology innovation, today unveiled [Synhix](#), a pioneering Chrome extension designed to revolutionize the way users read text on the web. Synhix introduces color-coded syntax highlighting to natural language on websites, a method that has significantly enhanced programming language comprehension and information retrieval for programmers. By adapting this proven approach to everyday web reading, Synhix aims to improve reading efficiency and comprehension for a broader audience.

Key Features of Synhix

Intelligent Emphasis: Automatically de-emphasizes common words to let readers focus on the content that matters, enhancing comprehension and speed.

Color Highlights: Utilizes colors to differentiate text elements – proper nouns and symbols in reddish hues for standout recognition, numbers in blue, and verbs in green, anchoring the reader's attention to crucial actions and data.

Block Highlighting: Enhances the readability of quotes and parenthetical information by marking them

as distinct blocks, aiding in efficient skimming and detailed reading.

Personalized Reading Experience: [Synhix](#) offers a range of customization options, including adjustable themes, color biases, and contrast levels, enabling users to tailor their reading experience to their taste and achieve maximum reading efficiency.

Commitment to Privacy: Designed with a strong commitment to user privacy, Synhix operates without compromising the confidentiality of web activities.
