

UK Telecom Distribution to Showcase Cutting-edge Global Connectivity Solutions at MWC Barcelona 2024

Discover UKTD's latest global connectivity solutions at MWC Barcelona 2024, revolutionizing travel & business with cutting-edge eSIM technology.

Edinburgh, Scotland Feb 27, 2024 ([Issuewire.com](https://www.issuewire.com)) - UK Telecom Distribution (UKTD), Scotland's leading B2B connectivity services provider is all set to unveil its futuristic offerings at the Mobile World Congress 2024 in Barcelona, Spain from February 26th to 29th.

As part of the Scottish Development International pavilion at the conference, UKTD would be showcasing a broad range of eSIM connectivity and sales solutions, in addition to their payment services and distribution systems.

The company has recently been on the expansion path, inking deals with some of the largest telecommunication networks in Asia, including Thailand's DTAC and AIS. Being partnered with top networks in Europe including Three UK and Orange France since the beginning, this expansion sees them capitalizing on Asian markets to simplify connectivity issues for international travellers in Southeast Asia, particularly for travellers visiting from Europe and North America.

The Mobile World Congress Barcelona 2024 is the largest mobile event in the world, bringing together the latest innovations and leading-edge technology from more than 2,400 leading companies.

"UKTD has always embraced sustainability and innovation in its approach to connecting the world. Our enduring belief in the idea of making connectivity simple and robust for the everyday user from anywhere around the world, is reflected in all our offerings," said CEO Vikash Kumar, on the occasion of the announcement of the company's participation in the event.

In this regard, it is worth noting that the company's worldwide eSIM brand Holiday eSIM has earned praise from leading tech publications including Tech Radar, as well as numerous tour and travel influencers.

Some of UKTD's latest innovations include an eSIM Terminal for retail establishments and a new range of prepaid eSIM plans for Asia with a focus on China, following their recent partnership with China Mobile. This is in addition to their vast presence in thousands of retail outlets across Scotland and the UK.

Moreover, their expertise in IoT and payment gateway solutions complement and align harmoniously with a world that's becoming more hyperconnected.

As we see the advances in [AI bring about revolutionary changes in almost every sphere of life](#), it is an exciting time to be thinking about the roles it can play in the telecommunications industry. We are thrilled to be a part of this conference and look forward to contributing to the vibrant tech ecosystem in Scotland, Mr Kumar stated.

About MWC Barcelona

MWC Barcelona, also known as Mobile World Congress, is a yearly event focused on the mobile communications sector.

This convention typically takes place in February or early March at the Fira de Barcelona Gran Via in

Barcelona, Catalonia, Spain. The event attracts a diverse audience, including mobile device manufacturers, network equipment providers, wireless carrier representatives, and media personnel, among others. The event usually draws around 100,000 attendees each year. It's a popular platform for mobile phone manufacturers to reveal their upcoming products.

About UKTD

UK Telecom Distribution, founded in 2011, initially offered innovative telecom solutions and has since evolved into a prominent FinTech company. Based in Edinburgh, UK, it's registered with the UK's Financial Conduct Authority and the VISA Card Scheme as a Payment Service Provider.

UKTD provides a range of services, including omnichannel payment services and distribution systems, not only in the UK but globally. It offers robust and secure software solutions, ranging from IoT SIM management to on-demand electronic voucher distribution. It has implemented various custom systems like Lottery Management Systems, Mobile top-ups, Digital vouchers, and Loyalty card platforms for businesses worldwide.

UKTD's systems facilitate on-demand retail sales of digital products, providing instant billing, real-time reports, and leading security features across various user interfaces.
