

Assure a Smile Offers Safe Mercury Filling Removal in Miami

Assure a Smile, a Miami-based dental practice, is offering safe mercury filling removal for patients who are concerned about the health risks associated with this type of dental restoration.

Miami, Florida Mar 19, 2024 ([Issuewire.com](https://www.issuewire.com)) - Mercury fillings, also known as dental amalgam, are made up of a mixture of mercury and other metals. When used as a dental restorative, mercury amalgam can be harmful to health. Studies have shown that people with mercury fillings have a significantly higher risk of developing chronic illnesses and disorders, such as neurological problems, autoimmune diseases, and cancer.

At Assure a Smile, [mercury filling removal](#) is performed using a variety of techniques to protect patients from exposure to mercury vapor and amalgam fragments. These techniques include:

- Using dental dams to cover the mouth and prevent soft tissues from exposure
- Using air filters to prevent inhalation of mercury vapor
- Using advanced filtration systems to dispose of mercury amalgam in a safe and eco-conscious way

In addition to safe mercury filling removal, Assure a Smile also offers a variety of other dental services, including:

- Teeth whitening
- Dentures and implants
- Cosmetic dentistry
- Children's dentistry
