

Beyond Intranet Launches Microsoft Fabric Consulting Services

Chicago, Illinois Mar 28, 2024 ([IssueWire.com](https://www.issuewire.com)) - Beyond Intranet, a leading technology solutions provider, today announced the launch of its new consulting services optimized for [Microsoft Fabric](#). This move aligns with Beyond Intranet's commitment to equipping clients with cutting-edge cloud solutions to drive digital transformation.

Microsoft Fabric enables scalable and reliable distributed applications, becoming indispensable for modern businesses. Recognizing growing enterprise demand for Microsoft Fabric expertise, Beyond Intranet developed an extensive suite of consulting offerings to help clients maximize their potential.

Service Offerings

Beyond Intranet's [Microsoft Fabric consulting services](#) include:

- **Architecture Design & Implementation** - Tailored architecture optimized for integrating Microsoft Fabric into existing infrastructures.
- **Migration & Deployment** - Expert support for transitioning legacy apps to Microsoft Fabric smoothly and efficiently.
- **Performance Optimization** - Proactive optimization to enhance the responsiveness of apps on Microsoft Fabric.
- **Security & Compliance** - Assessments, audits and best practices for regulatory compliance and data protection.
- **Training & Support** - Custom training and ongoing support for effectively managing Microsoft Fabric.

"As a leading Microsoft partner, we're thrilled to offer the first consulting services purpose-built for Microsoft Fabric," said CEO Piyush Goel. "These new capabilities demonstrate our commitment to equipping clients with the most advanced solutions to accelerate their digital transformation."

For over 15 years, Beyond Intranet has been at the forefront of technology consulting, enabling data-driven decision-making and powering digital workplaces. This latest move extends Beyond Intranet's track record of innovation excellence.
