

"BioTech Firm Set to Unveil AI for Dog Breed & Wellness Testing!"

PETACARE is a leading biotechnology company dedicated to advancing pet care through innovation and technology.

DNA IDENTIFICATION CERTIFICATE

 **BIOTECH PET**

BIOTECH PET QR TAG#: 007

Name:	Tobby Rayn
Gender:	Female
Color	Brown
Birth Date:	2023-03-05
Owner:	Jack Rayn

Disclaimer: Your pet's complete 200+ DNA genetic marker information can be found in your pet's [profile](#)

Sample ID: 1234
Order #: asdfg
Report Date: 2023-03-06

Atlantic Beach, Florida Apr 5, 2024 ([Issuewire.com](https://www.issuewire.com)) - The PETACARE Company, a pioneering biotechnology firm, is set to launch its revolutionary mobile application this summer, heralding a new era in pet care and welfare. By seamlessly integrating state-of-the-art artificial intelligence (AI) and DNA technologies, PETACARE is transforming the landscape of pet ownership and health management.

As the first biotech company to combine AI and DNA technologies specifically for pets, PETACARE sets a precedent for innovation and excellence in the pet care industry. Pet owners can anticipate accessing comprehensive AI and DNA analysis through its soon-to-be-unveiled mobile app, empowering them with invaluable insights into their pets' genetics, breeds, and overall wellness.

"Innovation lies at the heart of PETACARE's mission, and our upcoming mobile app exemplifies our commitment to revolutionizing pet care," stated Dr. Naomi Wang, Executive Vice President of PETACARE. "By harnessing the power of AI and DNA technologies, we aim to empower pet owners

with the knowledge and tools needed to provide optimal care for their furry companions.”

Key features of the PETACARE mobile app, set to launch this summer, include:

1. ****AI & DNA Analysis****: Pet owners will gain access to in-depth AI-driven analysis of their pets’ genetic makeup, enabling precise identification, breed determination, and insight into potential health concerns.
2. ****Continuous DNA Research and Updates****: PETACARE’s advanced DNA technology will continuously update and refine pets’ genetic profiles, ensuring owners can access the most accurate and up-to-date information about their pets.
3. ****AI Satellite Imagery for Lost or Stolen Pets****: Through AI satellite imagery technology, PETACARE will offer an innovative solution for locating lost or stolen pets, surpassing the limitations of traditional microchips with real-time tracking capabilities.

Additionally, PETACARE Company will introduce the following services:

- ****Breed Testing****: Determine your pet’s precise breed heritage accurately, providing valuable insights into their lineage and potential health predispositions.
- ****Wellness Testing****: Assess your pet’s overall health and well-being with comprehensive wellness testing, identifying potential health issues early for proactive management and care.
- ****Genome Testing****: Delve deeper into your pet’s genetic makeup with genome testing, uncovering unique traits and potential susceptibilities to specific diseases or conditions

Moreover, PETACARE will integrate AI machine learning into its platform, continuously analyzing your pet’s breed, wellness, and genome results to provide a more in-depth look at your pet’s genetics. This effort aims to extend and enhance your pet’s life by offering personalized insights and recommendations tailored to their genetic makeup.

The forthcoming launch of the PETACARE mobile app and these innovative services is anticipated to capture widespread attention across the pet care industry and tech community, heralding a new era of informed and empowered pet ownership.

In addition to this milestone, PETACARE is excited to announce its plans for crowdfunding investment opportunities coinciding with the app launch. Interested investors are encouraged to sign up on the PETACARE website to receive more information and participate in this groundbreaking opportunity.

“Our vision for PETACARE extends beyond innovation; it encompasses collaboration and partnership with investors who share our passion for transforming pet care,” commented Dr. Wang.
