**Krishnanagar, West bengal Mar 12, 2024 ([Issuewire.com](http://Issuewire.com))** - Microlive Technology is proud to announce the launch of our latest innovation: Digital Prescription Software. This cutting-edge technology is designed to streamline prescription management for healthcare providers, offering a comprehensive solution for creating, storing, and managing electronic prescriptions.

Our Digital Prescription Software features include:

Electronic prescribing capabilities

Medication history tracking

Drug interaction checking

Secure communication with pharmacies

Direct sending of prescriptions to patients via messaging apps like WhatsApp

Backup and delete options for secure storage and management of prescription data

The software's ability to send prescriptions directly to patients via WhatsApp provides a convenient and efficient way for healthcare providers to communicate with their patients and ensure the timely delivery of prescriptions. Additionally, the backup and delete options ensure the secure storage of prescription data and enable the removal of outdated or incorrect prescriptions.

With a focus on end-to-end IT solutions, Microlive Technology is dedicated to providing top-notch services to companies of all sizes. Our experienced team, extensive domain knowledge, and proven track record of delivering quality solutions within timelines make us a reliable and trusted IT partner for all your needs.
