

Limina & Daymi Partner to Improve Oversight & Operational Resilience

New partnership

Integrated Operations Hub solution helps investment managers strengthen:

- ✓ **Oversight**
- ✓ **Operational resilience**

Stockholm, Sweden Mar 15, 2024 ([Issuewire.com](https://www.issuewire.com)) - Limina Financial Systems and Daymi today announced a strategic partnership to integrate Daymi's Operational Hub solution into Limina's Investment Management System (Limina IMS).

Daymi's comprehensive Operations Hub solution helps clients consolidate their checklists, workflows, and tasks into one place, combined with full audit and documentation capabilities, making it easier to track progress intraday, onboard new team members, and greatly simplify Operational Due Diligence and audits.

The integrated solution is live and available as an add-on for all Limina clients.

"The team at Daymi shares our vision of empowering investment management teams, and their excellent solution to some of the problems around recurring tasks that most Operations teams face on a daily basis is highly complementary to the strong exception-based workflows in Limina IMS. The integrated solution presents an exceptional platform for investment operations teams to optimise operational efficiency and resilience," said Joakim Saltin, Chief Product Officer at Limina.

"We've been working together with Limina for quite some time and are impressed by the platform and its design that takes Operations into account and enhances their workflows. This integrated solution provides the non-trading part of the business with a unified place where both the automated and manual procedures are consolidated, documented, and ready to be proven for BoD, Investors, or regulators" said Carl-Fredrik Svensson, Chief Executive Officer at Daymi.

About Limina

Limina's Investment Management Solution helps asset managers boost productivity while decreasing cost and operational risks through a unified platform spanning the entire investment lifecycle. Founded in 2014, and headquartered in Sweden, Limina serves a growing global client base of institutional asset managers with our award-winning cloud-native SaaS product and managed services.

About Daymi

The team behind Daymi has spent their entire careers in Operations, understanding the daily grind of reconciliations, valuations, and payments as well as the hard work that goes into proving that. Daymi, born as an internal tool at a leading Nordic fund administrator, simplifies tracking, scheduling, and recording of operational tasks and incidents. And at the same generates data and proof to be used for improvements and to help you show off in ODDs, audits, and regulatory reviews.
