

M3C Earns Annual ICC-ES Certification

The certification allows M3C to produce code compliant cold-formed steel (CFS) products

Sacramento, California Mar 25, 2024 ([IssueWire.com](https://www.issuewire.com)) - M3 Components (M3C) has secured its annual International Code Council Evaluation Services (ICC-ES certification) for cold-formed steel products. This accolade underscores the company's commitment to continuous optimization of manufacturing, meticulous supply chain management, and adherence to rigorous quality standards.

The certification allows M3C to produce code compliant cold-formed steel (CFS) products utilizing the **Howick** FRAMA 7600 roll former. Approved products include studs, joists, track and deflection track for non-load-bearing interior walls, curtain walls, load-bearing structural walls, and additional CFS framing products.

Utilizing these standards, M3C generates project specific submittals for the various stud, joist, and track sizes to be produced. These submittal packages will give customers information on everything from the members' profile, down to the tensile strength rating, galvanized coating thickness, as well as the various custom punch, dimple, and swaging operations the machine can perform to eliminate build up for flat wall finishes and ease of MEP installation.

Currently, M3C produces 37 ICC-ES-approved CFS products under the Evaluation Report ESR-4576, ranging from 3-5/8", 4", 6", and 8". M3C's CFS product catalog will continue to grow as the company

adds new Howick machine tooling.

About

Mark III is a family-owned construction company with three unique and complementary businesses – M3 MEP, M3 Service, and M3 Components. From concept to maintenance, Mark III delivers projects across California and specializes in healthcare, higher education, and industrial projects.

M3 MEP is a mechanical, electrical, and plumbing contractor specializing in the healthcare, higher education, and industrial industries. (mark-three.com)

M3 Service provides 24/7 mechanical, electrical, and plumbing service across Northern and Central California. (mark-three.com)

[M3 Components](#) is revolutionizing the way healthcare projects are planned and delivered through industrialized construction and manufacturing offering a diverse set of product lines such as our [HCAI Exam Pods](#) and [Restroom Pods](#) known as our M-Pod.
