

## Meritech expands product offering with Smixin sustainable handwashing solutions

Meritech, the pioneer in automated hygiene technology, announces the expansion of their hygiene equipment offering with the introduction of the Smixin product line.

**Golden, Colorado Apr 1, 2024 ([Issuewire.com](https://www.issuewire.com))** - Meritech, the pioneer in automated hygiene technology, announces the expansion of their hygiene equipment offering with the introduction of the Smixin product line.

The Smixin product range transforms hand hygiene practices, efficiency, and cost-effectiveness for businesses nationwide. These products are designed to offer a unique user experience, blending modern design, user-friendliness, and eco-friendliness, making them ideal for various industries like food service & retail, healthcare & medical, travel & hospitality, and other public-facing sectors.

The Smixin line includes the Flow low water consumption faucet, the Plus water and soap faucet, and the Pro handwashing station. The Pro model offers three variations: Pro, Pro Display, and Pro Light, with multiple mounting options such as counter-top, wall-mounted, and mobile base.

David Duran, the Chief Executive Officer, expresses excitement about the new product line. He states, "We are thrilled to introduce this new range of products that align closely with our 'Why' of redefining human hygiene for a healthier and safer world." The Smixin products cater to customer-facing markets, offering a distinctive and interactive handwashing experience that encourages proper hygiene practices while also reducing the environmental footprint.

Smixin's sustainable handwashing stations feature advanced low-flow Smart Mixing Unit (SMU) technology that combines water, soap, and air efficiently, setting a new benchmark in water conservation. By reducing water consumption by an impressive 90%, these stations use approximately 6.7oz or less than or one cup of water per hand wash.

Moreover, the Smixin line includes a smart dashboard that tracks water, soap, and paper savings, enabling businesses to monitor and adjust usage settings. In the Pro Display model, businesses can upload videos and images for advertising and communication purposes, making it a valuable tool for front-of-house food service establishments.

Meritech will be demonstrating the Smixin product line at booth 429 at the 2024 Colorado Restaurant & Bar Show April 2nd - 3rd in Denver, CO. Learn more about Smixin sustainable handwashing solutions at: <https://www.meritech.com/products/smixin-sustainable-handwashing-solutions>
