

SellEton Scales Introduces Revolutionary Metal Bending & Forming Machines

Valencia, California Mar 30, 2024 ([Issuewire.com](https://www.issuewire.com)) - SellEton Scales, a leading innovator and manufacturer in the industrial weighing and metalworking sector is thrilled to announce the launch of its groundbreaking sheet metal bending & forming machines: the [SL-250-TON-13PB](#) and [SL-33-TON-5PB](#). Engineered for precision and efficiency, these machines mark a significant advancement in metalworking technology, offering unparalleled performance and versatility to meet the diverse needs of

the industry.

Dara Nazery, President of SellEton Scales, commented on the launch, stating, *"These machines are not just tools; they are game-changers that redefine what's possible in metalworking. Our new models bring unmatched precision, power, and ease of use to the workshop, making complex bending tasks simpler and more efficient. This launch represents our commitment to innovation and our dedication to providing solutions that truly meet the needs of our clients."*

The SL-33-TON-5PB model boasts a force of 33 tons across a 63-inch worktable, powered by a 220V, 3-phase electrical system. It features an intuitive Estun E21 2-axis controller for up to 40 specialized programs and includes safety measures such as integrated light curtains. Its compact design and robust construction make it an ideal solution for high-efficiency, precision metal bending and forming.

On the other hand, the SL-250-TON-13PB is designed following the latest EU streamlined standards, offering a bending force of 2500 KN and a bending length of 4000 mm. It features advanced synchronization of the Y1 and Y2 axes for precise control, a servo motor for reduced energy consumption, and a comprehensive suite of components from leading global suppliers for unmatched reliability and performance.
