

US Tech Company Nvidia Launching its Latest AI Chip

Nvidia has announced its latest AI chip 'Blackwell', which has been making a huge buzz recently. This AI chip is all set to bring a whole change in the global industry.

San Jose, California Mar 19, 2024 ([Issuewire.com](https://www.issuewire.com)) - The American corporation and technology company, Nvidia has recently revealed their new AI chip. According to their report, it is coming to know that artificial intelligence can accomplish any work 30 times faster. It is the company that has nearly 80% market share and has the capability of dominating all.

As of now, it is coming to see that Nvidia is the third-most valuable company in the whole United States. The chief executive of the new chip 'Blackwell', Jensen Huang has given many details regarding it. He said 'I hope you realize this is not a concert'. With this new chip, Nvidia is bringing a lot of changes, which we will get to know with each passing day. The company will let everybody know what the capability of this latest AI chip is.

On the other hand, the Technalysis researcher, Bob O'Donnell has said a few things regarding this chip. He has stated 'the buzz was in the air... I haven't seen something like this in the tech industry in quite some time'. In addition to that, he has also said 'In fact, some people were making analogies to the early days of Steve Jobs types of presentations'.

Nvidia is a company that is the biggest supplier for companies like Google, Microsoft, Apple, and OpenAI. So, this chip will be available to all these big companies. From this, it can be understood that it will implemented very recently by all these companies. Now AI has become one of the biggest things for every venture. Artificial intelligence can bring many drastic changes in every industry. And that is why, it is growing even more with each passing day.

The company Nvidia was founded in the year 1993 and initially used to work for computer graphics chips. Regarding this company and its shares Bob O'Donnell stated a few more things and said 'even if Nvidia loses some share, they can still grow their overall business because there's just a lot of opportunities for everybody'.
