

Stelo Technology Helps Business To Maximize Efficiency

Stelo Technology helps FinTech giants with automating in the Automation Testing of all Testing processes to maximize efficiency to meet expectations.

Bengaluru, Karnataka Apr 15, 2024 ([Issuewire.com](https://www.issuewire.com)) - [Stelo Technology](#) helps FinTech giants with automating in the Automation Testing of all Testing processes to maximize efficiency to meet expectations.

The Need –

Our client created a fantastic mobile app for their customers to effortlessly handle their accounts, pay bills, transfer money, and more through their network. While their in-house testing team successfully conducted manual tests on the app, they encountered numerous difficulties when attempting to automate the testing process.

Hence, they are seeking a reliable Mobile App Testing Company that can cater to all their automation requirements and collaborate effectively with their internal team.

Overcoming the Automation Challenges –

The app had many features and functions that involved money. So, we made over 500 test cases to test

it well. We ran tests on Android and iOS at the same time to find bugs early and save time. We ran all the automated tests on the client's remote machines. We fully integrated JIRA to make issues for failed tests and to update test status with proof of test.

An Extensive POC –

Because their internal team encountered many automation challenges, the client was initially hesitant. They asked for a detailed POC exceeding 5 test cases for Android & iOS. To build trust, we showcased a comprehensive project overview, including key features like JIRA integration to update test results with solid proof of execution.

Reduced Testing Time & Enhanced

Bug Management – Improving Efficiency in Testing Process

- Reduced testing time by implementing parallel test execution on Android and iOS platforms.
- Automated updates in JIRA for test case execution status and proof of execution.
- Automated issue creation in JIRA for bug fixing.
- Ensured no impact on execution of other test cases in case of failure.
- Diverse Recharge & Payment Options
- Variety of payment options available.

Test Execution on an In-House Machine –

To meet the client's request, we scripted and conducted our automation tests on their internal systems. To address the multitude of challenges associated with automating tests on a remote machine, we crafted the scripts on a local machine using a VPN, and subsequently transferred them to the in-house machines.

Sign-Off Document –

They set up tests on their machines. Then, they just needed a sign-off to run automation. So, we created a sign-off document at the project's end.

It included key automation information-

This covered the framework, modules, job description, tools, and languages. Also, it provided clear execution instructions.

Future Plans – The client loved our work and hired us for more projects. We are currently running automated tests on their web application for administrators.

ABOUT Stelo Technology:

Stelo Technology exists to help organizations like yours enjoy the benefits of a full QA department without the associated setup cost and hassle.

Our clients are at the center of everything we do at Stelo. We were built on the belief that in order to be exceptional at something, you must be incredibly focused. That is why we are a solely focused independent testing services agency, we empower our clients to develop the best software in terms of

functionality, usability, performance, and scalability.

We deliver high-quality QA outsourcing services using a hybrid onsite-offshore model that combines offshore technical talent with U.S. management and QA engineers embedded in our clients' engineering departments — enabling them to avoid the risks that often accompany a remote testing team.

We offer below services through flexible models (hours/day, hours/week, hours/month) :

????Our expertise????

- Mobile Application Testing Services
- Automated Testing Services
- Manual Testing Services
- Functional Testing Services
- Performance Testing Services
- Regression Testing Services
- Quality Assurance Outsourcing

To learn more about how we can seamlessly integrate successful QA outsourcing into your organizational structure, please contact our Client Success Team for a free consultation at EmailUS: sales@stelotechnology.com or visit our website at www.stelotechnology.com

Why SteloTechnology?

Over 100+ companies use Stelo Technology to develop and fast-track their software testing needs for their business. You can check our home page to confirm the report.

We pride ourselves on the highest quality work at all times. With 100+ clients, \$\$M+ in revenue, and 15 years of experience, there is no way we can go wrong.!

In fact, if you take action now, we shall offer you a 2 week risk free trial to work with you and see for yourself how your business will take on a new positive shape.

Yes.. 2 week risk free trial to reward your decision to work with us! EmailUS: sales@stelotechnology.com
