Los Angeles, California Apr 15, 2024 ([Issuewire.com](http://www.Issuewire.com)) - Phenomena covered in the world of science such as particles, molecules and cells are powers of human imagination. In literature, imagination creates story events and relationships among characters. Creating marvelous new products and ideas are

always possible in human thought and imagination.

In “Think Like a Molecule,” former Disney communications executive Chuck Champlin celebrates human imagining of properties in the physical world, and the similar ways this can inspire organization in our daily lives.

This year, Champlin appears at the 2024 Los Angeles Times Festival of Books, in coordination with publisher Authors Press, Saturday and Sunday, April 20 to 21, at the University of Southern California.

A writer and journalist, Champlin offers the “twinkle” as a “molecule of thought,” suggesting an awakening of one’s inner child, and a nurturing of inspiration and creative ideas.

Reviewing “Molecule” in IndieReader, Kent Lane wrote: “Think Like A Molecule means being aware of how the universe was founded and how it evolved to create humanity and civilization, noticing how things work together and looking for ways that different combinations might find answers to practical problems”

Lily Amanda in the Pacific Book Review said: “Champlin brilliantly brings technology, science, religion, philosophy, and history together in an alluring look to how a molecule opens a world of possibilities to humankind.”
